

Available Finish: 316L Grade Stainless Steel

Read these instructions before commencing installation. Please give these instructions to the owner/occupier after installation to retain for future reference/maintenance.

IP65 0.5m 240VAC~50Hz 35W Max.

These fittings are Class I and must be Earthed

**Important Information**

It is recommended that these luminaires are installed and fitted by a qualified electrician ensuring the installation complies with current IEE wiring regulations & local building control. These products are designed for connection to a 240V~50Hz supply.

Any faulty, broken or damaged luminaires should be replaced immediately.

KSR will not accept responsibility for any claims arising from a poor installation.

Please Note: The limited warranty shall be deemed null and void in the following circumstances: Failure by the installer, end user or any third party to exercise caution to protect any covered product or part from outside damage, adverse temperature, humidity conditions, fluctuations in the electrical system or physical abuse as well as failure related to workmanship in the installation of the products or parts.

**Important User Advice**

Always safely isolate mains supply before installing/servicing.

KSR recommends a cleaning schedule at least quarterly using non abrasive cleaners. Also installing a water repellent grease on all serviceable screws.

When using third party connectors always ensure that they are installed as per the manufacturers instructions and are at least equal to the luminaires IP rating (KSR recommend IP68). Failure to install correctly can cause issues with moisture ingress and will invalidate the products warranty.

At the end of life the luminaire is classed as WEEE under directive 2014/30/EU and should be disposed of in accordance with local legislation.

**Installation Procedure**

Familiarize yourself with the luminaire/installation procedure and ensure the power is safely isolated before installing the luminaire.

Connect to the mains supply using a suitable waterproof connector.

Please note the pre-wired cable is not suitable for in ground use.

Unscrew the lamp cap (anti-clockwise) fit lamp (maximum 35W) if using GU10 LED lamps please check with the manufacturer that they are suitable for use in enclosed luminaires.

Re-fit lamp cap ensuring that the seal is in place.

Turn on mains supply and test luminaire.
