

MYHEAT Cement Coated Insulation Board

MYHEAT cement coated insulation boards will significantly reduce heat losses into the subfloor, improve performance and the initial warm-up time reducing energy consumption. It is recommended when installing underfloor heating on all concrete subfloors.

Features include:

- Available in 6mm or 10mm
- Waterproof
- Can be fixed to any surface
- Keyed surface ready to receive the adhesive
- Easy to work with - cut with a knife or saw
- Lightweight and easy to handle
