

MYHEAT Pipe Freeze Protection

MYHEAT Pipe Freeze Protection Cables are a quick and easy way to protect pipes during cold weather. The cable is made up of a pre-terminated, fixed resistance cable, including an integrated thermostat which monitors the temperature of the pipe. This saves energy by ensuring that the cable is only switched on when it is needed.

Features Include:

- Protects hot and cold water pipework that may be subject to freezing conditions
- Suitable for both metal and plastic pipe up to 50mm diameter
- Ready made with a 1.5m cold tail and three pin plug
- Integrated thermostat ensures system turns on when temperature falls below 3°C
