

TARMAC 90L PNEUMATIC

Based on our traditional 'Navy' barrow, the Integral, the Tarmac barrow is specifically designed to withstand the rigors of the Tarmacking industry. In addition to the integrated tubular front support welded to the frame, the Tarmac barrow features a steel reinforcing plate under the pan and a steel wheel for better heat distribution. Offering excellent manoeuvrability and weight distribution, the Integral is designed to load and unload quickly, making short work of large loads.

KEY FEATURES

PAN

Heavy duty steel pan with double rolled lip and steel plate reinforcement. The wide body style makes loading and unloading simple.

POWDER PAINT

Polyester powder paint finish, hard wearing and looks good for longer.

FRAME

30mm single piece frame with tipper nose and welded brackets

SUPPORT

Integrated tubular front support welded to the frame, offering better weight distribution and increasing overall strength.

WHEEL

Pneumatic wheel fitted to a steel wheel center for better heat distribution.

TESTING

Each batch of wheels is burst tested to more than 3 times the recommended PSI to ensure that every wheel we make is safe and durable.
