Paint Applicator Data Sheet

The APA has been designed to be used as a wand paint applicator with no wheels ideal for quick spot jobs without the need to bend down. In addition to this the case unit can have either a 2 wheel chassis or a 4 wheel chassis which are fully interchangeable so when you need extra stability you simply add the back carriage with the extra wheels.

The 4 wheel chassis addition also has storage space for 2 additional cans of paint ensuring you do not have to keep retuning to stores for more paint.
