

50mm Mag-Bits

MAG-BIT USER INSTRUCTIONS

- Do not attempt to drive the screw heads below the surface or strike the surface with the magnetic collar. This could damage the magnet

- If the magnetic collar breaks through misuse, it can be removed and the bit can then be used as a standard screwdriver bit
- If the screw heads need to be driven below the surface, standard screwdriver bits should be used or the magnetic collar should be removed
- If replacing / interchanging magnetic collars, ensure the correct sized collar is used on the bit in question
