**CONSTRUCTION & DIMENSIONS SHEET:**

HDMI15-RO - Ross HDMI Cable 1.5m
 HDMI3-RO - Ross HDMI Cable 3m
 HDMI5-RO - Ross HDMI Cable 5m

Head construction

The Ross HDMI cables all consist of a plastic moulded head, which features easy grip to aid installation/removal of the cable. 24K Gold plated contacts for maximum signal transfer and ultra-low distortion at the point of connection. Finished with a strain relief to aid installation and protect the cables geometry when the cable is under tension.

Cable construction

The Ross HDMI cables are constructed from "OFC" Oxygen Free Copper to maintain signal transfer. Wrapped in a dielectric insulation foam for maximum signal transfer. Protected by high density triple-layer shielding for maximum noise rejection. Triple layers consist of a copper braid shielding covering the insulated braid, this offers high frequency protection and low DC resistance. These are then wrapped in foil tape shielding offering maximum coverage and added protection and finally wrapped in Copper braid shielding for high frequency protection and low DC resistance. This is all covered by a PVC protective jacket overall providing a robust design that will last.
