

METEX[®]

SILICONE BLOCK

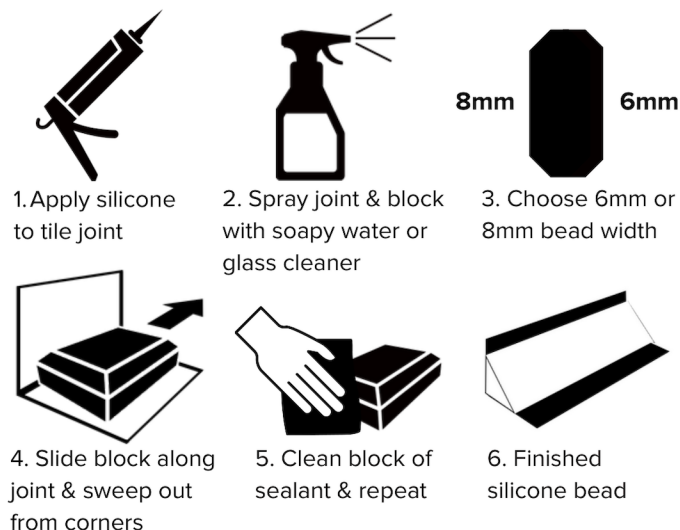

SILICONE FINISHING TOOL

Benefits

- Ideal for sealing shower trays, bathtubs and sinks
- Creates a consistent width silicone bead easily
- 6mm or 8mm bead width depending on which side of the block is used
- No bead dents when going over grout joints
- Forms sharp internal corners
- Works behind taps and in tight areas - only 30mm wide
- One tool for all sealant jobs - no multiple parts needed
- Leaves a clean straight edge in the joint - no trough in which water could gather

How It Works

Important notes:

- Avoid contact with solvent cleaners!
- Spray block during use to minimise silicone sticking
- Wipe block & blade edges clean after use
- Dried residue of most silicone sealants picks off the block

Technical

Width	55mm
Length	75mm
Height	30mm
Weight	88g
Material	Silicone compound
Side 1 bead width	6mm
Side 2 bead width	8mm
Grip type	Easy grip
Flexibility	Semi-flexible
Part number	SBL001

MD229.1
