

MPN: NLLN4G

Product Name: 38mm (1.5 Inch) Galvanised Steel Hexagonal Locknut

Brand: Newlec

Category: Metallic Conduit Accessories

Product Description: The 38mm (1.5 Inch) Galvanised Steel Hexagonal Locknut by Newlec is a high-quality locking nut designed for use in metallic conduit installations. It is specifically engineered to provide secure fastening and protection for cable glands in both surface and sub-surface locations. The locknut is manufactured using durable galvanised steel, ensuring longevity and reliability in various industrial and commercial applications.

Key Features:

- Compliant to London Underground (LU) Standard 1-085 for use on surface and sub-surface locations
- Compliant to BS EN 61386-1: 2008 for quality and safety assurance
- Designed as a locknut for cable gland (ETIM Class-9.0: EC000940)
- Constructed with steel material (ETIM Features: Steel EV000179) for robustness and corrosion resistance

Specifications:

Size: 38mm (1.5 Inch)Material: Galvanised Steel

Type: Hexagonal Locknut

Compliance: London Underground (LU) Standard 1-085, BS EN 61386-1: 2008

ETIM Class-9.0: Locknut for cable gland (EC000940)

ETIM Features:

o Material qualifier: Steel (EV000179)

Applications:

- Suitable for use in metallic conduit installations
- Ideal for industrial and commercial applications requiring secure cable gland fastening
