

MPN: NLMSD4N

Product Name: 4.5 x 20mm Self Drilling Steel Cavity Fixing Screw

Brand: Newlec

Category: Cavity Fixings

Product Description: The 4.5 x 20mm Self Drilling Steel Cavity Fixing Screw by Newlec is a versatile and efficient solution for fastening objects to cavity walls. This self-drilling fixing is designed to be used with double thickness plasterboard, making it suitable for a wide range of applications. The screw is supplied complete with screws, eliminating the need for additional components. With its self-drilling feature, it requires only a Pozidriv screwdriver for installation, saving time and effort. Additionally, the nylon self-drill reduces the risk of accidental shock, ensuring safety during installation.

Key Features:

- Self-drilling fixings for easy installation.
- Supplied complete with screws.
- Requires only a Pozidriv screwdriver to install.
- No drill required
- Can be used in double thickness plasterboard
- Nylon self-drill reduces the risk of accidental shock

Specifications:

- Material: Steel
- Length (mm): 20
- Head type: Other
- Screwing system: Other

ETIM Class-9.0: Self drilling tapping screw (EC002341)

ETIM Features:

- Material: Steel (EV000179)
- Length (mm): 20
- Head type: Other (EV000154)
- Screwing system: Other (EV000154)

Applications:

- Suitable for fastening objects to cavity walls.
- Ideal for use with double thickness plasterboard.
