

MPN: NLLB8

Product Name: M8 x 25mm Loose Shield Anchor Bolt

Brand: Newlec

Category: Bolts & Nuts

Product Description: The M8 x 25mm Loose Shield Anchor Bolt by Newlec is designed for heavy-duty fixing applications where bolts need to be inserted after positioning the shield. It is ideal for installing heavy equipment and machinery. This anchor bolt provides a strong and secure fixing in concrete, brickwork, and stonework. It features a segmented shield that expands when tightened, ensuring reliable and durable fastening.

Key Features:

- For heavy-duty fixing, where bolts have to be inserted after positioning the shield i.e. installing heavy equipment and machinery.
- Provides a strong and secure fixing in concrete, brickwork, and stonework.
- Comprises a segmented shield which expands when tightened.
- For pre-positioned and flush fixings.
- The wall bolt works by torque-controlled friction locking expansion.
- When the screw or hex. nut is tightened, the cone is pulled up into the expansion shield and pushes the segments against the drill hole wall.
- For best results, ensure the drill hole is dust-free.

Specifications:

- Thread size (metric): 8
- Drill hole diameter (mm): 12
- Bolt length (mm): 50
- Material: Steel
- Surface protection: Galvanic/electrolytic zinc plated

ETIM Class-9.0: Anchor fixing (EC000048)

ETIM Features:

- Thread size (metric): 8
- Drill hole diameter (mm): 12
- Bolt length (mm): 50
- Material: Steel (EV000179)
- Surface protection: Galvanic/electrolytic zinc plated (EV003454)
- Model: Drive-in type (EV003645)
- Thread type: Metric (EV003712)

Applications:

- Suitable for heavy-duty fixing applications
- Ideal for installing heavy equipment and machinery
- Can be used in concrete, brickwork, and stonework
