

MPN: NLBFG932

Product Name: 64mm² Pre-Insulated Crimp Bootlace Ferrule 9mm Grey

Brand: Newlec

Category: Insulated Crimps

Product Description: The 64mm² Pre-Insulated Crimp Bootlace Ferrule 9mm Grey, manufactured by Newlec, is designed for use with flexible copper conductors. It features polypropylene insulation, ensuring reliable electrical insulation and protection. The ferrule is annealed to guarantee optimum ductility, allowing for easy crimping and secure connections. Electrolytically tin-plated, it is resistant to oxidation, ensuring long-lasting performance. The ferrule is halogen-free, making it suitable for applications where low smoke and toxicity are required. With a temperature range of -20°C to +115°C, it can withstand a wide range of operating conditions.

Key Features:

- Polypropylene insulation for reliable electrical insulation.
 - Annealed to guarantee optimum ductility for easy crimping.
 - Electrolytically tin-plated to avoid oxidation and ensure long-lasting performance.
 - Halogen-free for applications requiring low smoke and toxicity.
 - Temperature range of -20°C to +115°C for versatile use.
 - Designed for use with flexible copper conductors.
-

Specifications:

- Construction type: Standard
- Nominal cross section (mm²): 4
- Sleeve length (mm): 9
- Colour: Grey
- Material: Copper

ETIM Class-9.0: Cable end sleeve (EC000005)

ETIM Features:

- Construction type: Standard (EV005866)
- Nominal cross section (mm²): 4
- Sleeve length (mm): 9
- Colour: Grey (EV000270)
- Material: Copper (EV000138)
- Surface protection: Tinned (EV001481)
- Material insulation: Polypropylene (PP) (EV001608)

Applications:

- Suitable for various electrical applications requiring insulated crimps
- Ideal for use with flexible copper conductors in industrial and commercial settings
- Can be used in control panels, switchgear, and electrical cabinets
