

MPN: NLP1132C

Product Name: 2P+E 32A 110V IP44 Yellow Female Screwless Industrial Power Connector

Brand: Newlec

Category: Industrial Trailing Sockets IP44

Product Description: The NLP1132C is a 2P+E 32A 110V IP44 Yellow Female Screwless Industrial Power Connector. It is designed to provide a connection to the main power supply rated at higher voltages and currents than household plugs and sockets. This power connector is suitable for industrial applications that require a reliable and durable power connection.

Key Features:

- Maintenance-free screwless terminals for easy and secure installation.
- Two-piece body with multigrip gland for enhanced strain relief.
- IP44 rated for protection against dust and water ingress.

Specifications:

- Amperage (A): 32
- Number of poles: 2
- Voltage (V): 110 -
- Degree of protection (IP rating): IP44

ETIM Class-9.0: CEE socket outlet (EC001321)

ETIM Features:

- o IEC-amperage (A): 32
- o Voltage acc. EN 60309-2: 110 V (50+60 Hz) yellow (EV009018)
- o Identification colour: Yellow (EV000234)
- o Degree of protection (IP rating): IP44 (EV006418)

Applications: The NLP1132C Industrial Power Connector is suitable for a wide range of industrial applications, including construction sites, workshops, outdoor events, and temporary power installations. It provides a reliable and secure power connection for equipment and machinery operating at 110V.
