

Switches

Modular Ingot Plate Switches
Dimmer Switches | Toggle Switches

All DECO™ switches are supplied complete with requisite switch module(s). However, should local conditions dictate, the installer may customise a switch arrangement by substituting switch modules by means of a simple, single fixing screw.

A comprehensive range of available modules is illustrated in our dedicated MiniGrid® brochure section.

Unfurnished mounting plates can be ordered separately and furnished with whatever selection of switch modules may be required.

All DECO™ switch plates are modular as standard, allowing you to create virtually any switch plate you require

e.g. Two way switch next to an intermediate switch (shown above).
