

QUALITY STAPLERS AND TACKERS

Our range of stapling, tacking and nailing tools cater for all levels of use. Whether tacking cables, reupholstering furniture, felting a roof or just stapling paper together, we provide a stapler for the job.

The length of the staple used in the stapler/tacker is an indication of the power of the device. The illustrations on the right identify the key attributes of the staples ie; height, thickness and width of the staple.

All of these products can be used as a tacker to drive straight-legged staples into wood or similar materials and those with an anvil can be used as an office stapler as they bend the legs of the staples over, binding the paper together.
