Additional Information:
Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram supplied with the relevant product.
These products are rated at 20AX; therefore all terminals should not exceed the stated amperage.
Bare earth cables must always be covered with appropriate sleeving and wired to the earth terminal.
All white moulded accessories are manufactured using Urea Formaldehyde, which has similar inherent properties to antimicrobial additives that inhibit the growth of infectious diseases. All products were independently tested and achieved a 99.9% kill rate across all four types of the strains of bacteria - MRSA, E-Coli, Salmonella, and Klebsiella Pneumoniae.
