Wijas Perfect water heater FAQs:

- ✓ **Space saving** - smallest electric water heater on the UK market
 - ✓ **Low power and energy efficient** – zero power drain when dormant
 - ✓ Industry leading **2 year swap-out warranty** – high quality, low failure rate
 - ✓ **'Non vented'** - so can be used with ordinary taps, ½" BSP/15mm fittings
 - ✓ **Simple to install** – fitting kit provided, no expensive extra equipment req'd
 - ✓ **Anti-scald safety** – P3500B 3.5kW delivers sub 48° temperature
 - ✓ **EU manufactured** – CE certification and award winning design
-
- **How do they make them so small?** – clever, but simple, electronics have replaced conventional, bulky solenoid valves and heating chambers so making these inline, instantaneous heaters the smallest on the UK market.
 - **Will they deliver the warm water I need?** – provided the temp/flow chart has been checked, any of the models will deliver warm/hot water at point of use ranging from: 32 – 60 degrees. (Water flow & model dependant)
 - **What are the recommended uses?**
 - hand-wash basins ie: in cloakrooms, studios, home office, workshops & Doc M
 - wash-basins: en-suite shower rooms, hand-wash & public access toilets.
 - light kitchen sink duties ie: office, workplace, staff facilities, etc
 - DO NOT install where there is a risk of freezing.
 - **I want to install one at my domestic kitchen sink?** – although very efficient, these units are **NOT designed to fill a kitchen sink** with lashings of hot water for greasy wash-ups or run enough hot water to fill a bath. We do not recommend them for this type of installation.
 - **What power will they require?**
 - the 3.5kW unit is rated at 15.2amps – 1.5mm cable
 - the 5.5kW unit is rated at 23.9amps – 2.5/4mm cable
 - **Will they work with normal taps?** – as the under-sink models units are 'non-vented' they will work with standard single taps, mixer and ceramic mono-bloc taps with no special equipment required, simply connect and go!! Check the water flow rate of your tap.
 - **Why use a spray tap?** – due to the reduced flow, converting your tap, using the insert we supply, will make a slow flow appear more lively and useful.
 - **What is the warranty?** – rest assured, each unit carries an industry leading 2 year 'no-quibble' UK swap-out warranty.

Recommended usage for heater models:

Application	Cloakroom/staff Hand basin	Bathroom or en suite Wash basin	Kitchen/office sink (light use)
Perfect 3500B (3.5 kW) u/sink	✓	x	x
Perfect 5500B (5.5 kW) u/sink	✓	✓	✓
