

Datasheet: Newlec outlet filter

Product family: Enclosure climate control

Product description:

Complete filter unit for tool-free mounting in enclosure walls or doors, which, when used in conjunction with a fan-and-filter unit, provides cooling for installed equipment in cool, clean environments. Alternatively, ventilation by convection may be achieved if two filter units, one at low level and one at high level, are fitted in the enclosure.

Packs of: 1 pc(s)

Supply includes: Complete unit ready to install, including filter mat

Material: ABS, material resistance to UL 94-5V

Colour: RAL 7035

Approvals: CE, UR, C-UR, CSA

Operating temperature: -15...+55 °C

Storage temperature: -30...+70 °C

Protection category IP to IEC 60 529: IP 54

Dimensions and weights:

Model number	Width mm	Height mm	Depth outside enclosure mm	Depth inside enclosure mm	Cut-out width / height mm	Pack weight kg
NLFILTER20	116.5	116.5	16	12	92	0.12
NLFILTER55	148.5	148.5	16	14	124	0.18
NLFILTER105	204	204	24	23	177	0.38

Note:

Use a thermostat to control fan-and-filter units and both save energy and extend service intervals.
