Limit switches

XCMW range
Wireless and batteryless limit switches
Miniature format

Product type Transmitters: plunger head and rotary head limit switches

Actuator type	Metal end plunger	Steel roller plunger	Thermoplastic roller lever	Steel roller lever
---------------	-------------------	----------------------	----------------------------	--------------------

Radio transmission	Transmission protocol	ZigBee® Green Power at 2.405 GHz (Channel 11, IEEE 802.15.4)
Maximum range	100 m in free field 300 m with a relay antenna in free field	
Transmission power	3 mW	
Activation time	30 ms	
Transmission time	< 7 ms	

Certifications and directives	Product certifications	EN/IEC 60947-5, EMC directive 2004/108/EC, R&TTE directive 1999/5/EC, UKCA, CE
Radio approvals	FCC (USA), IC (Canada), ACMA and RSM (Australia and New Zealand), MIC (Japan), ANATEL (Brazil: pending)	

Mechanical characteristics	Mechanical life	400,000 operating cycles
Maximum operating rate	3,600 operating cycles per hour	
Maximum tripping force	13 N	
Materials	Plastic bodies, metal heads	

Environment	Ambient air temperature	Operation: -25...+55 °C Storage: -40...+70 °C
Degree of protection	IP65 conforming to EN/IEC 60529	
Degree of protection	IK04 conforming to EN/IEC 50102	

Electromagnetic compatibility (EMC)	Electrostatic discharge	8 kV (air) and 6 kV (contact) conforming to IEC 61000-4-2	
	Electromagnetic fields	Test condition: from 2,000 to 2,700 MHz, conforming to EN/IEC 61947-5-1 and IEC 61000-4-3	
		Test level: 1 V/m	Test condition: from 1,400 to 2,000 MHz, conforming to IEC 61000-4-3, EN 301-489-1, and EN 301-489-3
		Test level: 3 V/m	Test condition: from 80 to 1,000 MHz, conforming to IEC 61000-4-3, EN 301-489-1, and EN 301-489-3
	Radiated emissions	Conforming to standards EN 300-440-1 and EN 300-440-2

Wireless and batteryless limit switches

Miniature format

XCMW range

Telemecanique Sensors has expanded its offer of wireless products with the XCMW range of limit switches based on an automatic radio wave generator system.

This range includes transmitters and receivers that communicate via 2.4 GHz radio transmission.

There is no need to use batteries, as the radio pulse is emitted while the actuator moves.

Operation is therefore one-way towards the receiver.

The XCMW offer can be used to determine the position of an item or part of a machine remotely, without a wired connection. The transmitter is equipped with a "dynamo" generator that converts the mechanical energy produced by the actuator movement to electrical energy.

A radio-encoded message (2.4 GHz ZigBee protocol) is then sent, by a single pulse, to one or more receivers located several dozen meters away.

The system is self-powered, which means no batteries are needed.

Each transmitter has a unique identification code, which enables optimal management of each one. To incorporate this code, a simple teach sequence must be performed on the receiver using the two buttons on the front face.

Thanks to this technology, the industrial applications field has diversified and now meets the requirements of machine manufacturers in terms of flexibility and modularity. It is the ideal product for confirming the position of a part remotely after a manual operation by an operator (1).

XCMW wireless limit switches are therefore particularly suitable (2) for:

- automatic doors
- expandable conveyors
- wheel chocks for trucks
- rotary machines
- turntables

Note: Receivers can be actuated by XCMW limit switches or ZB•RTA• Schneider Electric pushbuttons.

Simplified installation

- > Faster installation: no wiring between the limit switch and the receiver
- > No configuration necessary, thanks to the Plug and Play ready-to-use solution
- > Freedom of movement around the machine or process in order to detect parts that are moving or difficult to access

Reduced maintenance

- > No battery maintenance required
- > Optimum availability of control functions
- > Minimal post-installation maintenance (no need for periodic retightening of contact terminal connections, no cables to be replaced or repaired)

(1) An operating speed above 10 mm/s is recommended.

(2) XCMW wireless and batteryless limit switches are not suitable for hoisting applications or hazardous machinery.

For these applications and machines, the XC Standard range of cabled switches is ideal. Please contact our Customer Care Center.

Wave generated automatically without a battery

XCMW

Wireless offer:
one-way **pulsed** transmission

Multi-sensor transmitter

"Less-wire" offer:
Two-way **continuous** transmission
With the XZBWE112A24 multi-sensor transmitter, our "less-wire" offer allows continuous communication between the transmitter and the receiver (see page 13).

+ Wireless and batteryless switches for simplified installation

Limit switches

XCMW range

Wireless and batteryless limit switches

Miniature format

The miniature format of the XCMW limit switch allows easy integration in machines

Miniature format

One of the smallest formats on the market

> Ideal for automatic doors, the limit switch can be easily installed in aluminum profiles.

Improved performance

A relay antenna increases the signal range

> Range of 300 meters, in free field, using an external relay antenna
> Range of 100 meters in free field

Open protocols for easy integration

Large I/O capacity

> The offer includes a receiver that can manage up to 60 transmitters.
The signals received are converted to communication protocols.
> The proposed access points can be connected to an automation platform by Modbus RS485 serial link or Modbus/TCP protocol.

XCMW145

Description

“Components” offer

The XCMW range comprises:

- **9 wireless and batteryless limit switches** consisting of a plastic body and an actuator head taken from the existing **XCMN** and **XCMD** ranges.

- **3 receivers** that can be programmed using buttons on the front face:

- with 2 contact relay outputs, 24...240 V ~/---
- with 2 or 4 PNP transistor outputs, 24 V ---

- **2 access points** that provide open network connectivity by operating as an intermediate device between the transmitter and the PLC. The access point receives radio signals from the XCMW limit switches and converts them to communication protocols.

The access point is connected to the PLC using:

- an Ethernet Modbus/TCP communication protocol for **ZBRN1**
- Modbus RS485 serial link communication for **ZBRN2**

- **Accessories:**

- 1 active relay antenna to boost the signal when the receiver is in a metal enclosure or to get round obstacles in the case of a complex installation
- 1 external antenna for **ZBRN1** or **ZBRN2** access points to increase the range
- 1 communication module for Ethernet Modbus/TCP network

“Ready-to-use pack” offer

To make it easier to install XCMW limit switches, ready-to-use packs are also available. The transmitter (limit switch) and receiver are factory-paired.

Each pack contains:

- a limit switch
 - one version with metal end plunger
 - one version with plastic roller lever
 - one version with round plastic rod lever, Ø 6 mm
- a receiver with 2 time delay relay outputs

Environmental characteristics

Conformity to standards	Products	CE, EN/IEC 60947-5-1, UL 508, CSA C22-2 No. 14, CCC
	Machine assemblies	EN/IEC 60204-1
Product certifications		UL, CSA, CCC, UKCA
Protective treatment	Version	Standard: "TC"; Special: "TH"
Ambient air temperature	For operation	-25...+70 °C
	For storage	-40...+70 °C
Vibration resistance	Conforming to EN/IEC 60068-2-6	25 gn (10...500 Hz)
Shock resistance	Conforming to EN/IEC 60068-2-27	40 gn (11 ms)
Protection against electric shock	Conforming to EN/IEC 61140	Class II
Degree of protection	Conforming to EN/IEC 60529	IP65
	Conforming to EN 62262	IK04
Materials		Plastic body, metal head

Characteristics of XZBWR2STT24 receiver

Ambient air temperature	For operation	-20...+55 °C
	For storage	-40...+70 °C
Power supply		24 V \pm 100 mA max.
Outputs		2 + 2 PNP (200 mA each output)
Degree of protection	Conforming to EN/IEC 60529	IP20
Display		1 LED for each output, 1 LED for the power supply, 1 LED for the signal current

Characteristics of XZBWE112A24 radio transmitter

Radio range in free field		100 m
Typical radio range in industrial environment		25 m
Ambient air temperature	For operation	-25...+55 °C
	For storage	-40...+70 °C
Power supply (transmitter only)		24 V - 15%
Output power supply for sensor or limit switch		24 V - 15%/+20% - 100 mA max. (no overload protection)
Start-up time		< 0.4 s
Response time		30 ms
Input frequency		< 0.5 Hz
Degree of protection	Conforming to EN/IEC 60529	IP67
Display		1 green or orange LED depending on the mode

Accessories for wireless and batteryless limit switches

Network access points

Description

Standard access point with communication module

The **ZBRN1** access point has an empty slot for the **ZBRCETH** communication module to support the Modbus/TCP protocol.

This communication module has two standard Ethernet RJ45 connectors that provide connectivity for daisy chain operation and daisy chain loop operation (when used with Schneider Electric ConneXium Ethernet switches) and thus avoids the use of an external hub or switch.

Access point for Modbus serial link protocol

The **ZBRN2** access point has two embedded RS485 connectors that avoid the use of an external hub for an RS485 serial link connection. The supported data rates are 1200, 2400, 4800, 9200, 9600, 38,400, and 115,200 bps.
