OUR BRAND

At Internova, we plan and design professional LED lighting. Our main focus is in the retail and hospitality industry. As producers of light, we are proud of our broad selection of lighting products. We advise a lighting strategy based on LED modules, lumens, lighting colour and focal points. All our fixtures are made in The Netherlands. During the past 27 years, we have been part of many big hospitality and retail projects. Projects in collaboration with wholesalers and lighting specialists.

Our functional lighting is not only easy on the eye, but is designed with a purpose. Lighting not only has to contribute to the atmosphere, but it is also a part of the branding, routing and conversions. It takes more than just a set of lights and track to make it work. Lighting is a specialization, which makes it a real profession. And therefore; Internova

PROFESSIONAL LIGHTING

Dutch Craftmanship

IT ALL STARTS WITH LIGHT

Three different quotations were received for a stunning bar. An interior designer stuck to a drawing table, finally realized the perfect colour to put on the walls. Endless discussions were held about the right chairs. The interior of a store, restaurant or hotel has to be on point. The design of the establishment determines atmosphere and appearance. It is part of your brand. But what to do with the lighting? How do you incorporate this into your design, to contribute to perception and atmosphere? Have you ever really thought about this?

Utility
That's where you want to work!

The right lighting in a utility environment contributes to the well-being of the employees and creates a pleasant working environment. Our lighting planners can build beautiful 3D lighting concepts according to the latest NEN standard, for the perfect office environment.

Supermarket
The volume can be increased!

A common mistake is the use of flat line lighting in a supermarket, which means that there is no atmosphere and a bad appearance. By creating the perfect balance between general lighting and spot lighting, our lighting designers can provide the right atmosphere. Also consider applying special lighting for fresh food and cosmetics! This makes a visit to these stores a pleasant experience which contributes to the increase of sales volumes.

Showroom
Don't be that simple!

Light creates atmosphere, branding, conversion and routing. Good showroom lighting does not consist of a simple combination of spots and tracks. For the right lighting, a well-thought-out lighting plan is essential. Internova desins and realizes costumized (3D) lighting plans.

Restaurant & **Bar**
Make things happen!

In restaurants and bars, good lighting is not only important to create the perfect atmosphere, but must also be functional. By using the right combination of functional and decorative lighting a space can be brought to life.

Shops
Seductively illuminated!

If the layout of a shop changes, the lighting should always be easy to adjust. That is why Internova tracklights in combination with our flexible Powergear track system are perfect to use in any shop. Understand the art of seduction by creating a great product presentation using Internova's FASHION spot!

Fresh Food
That tastes like more, doesn't it?!

Where other LED food modules can cause food to perish (e.g. aging of fresh meat and fish) within a few hours, the Premium Food LED modules by Internova are suitable for lighting fresh food products without any issues. This is achieved by selecting the correct wavelength combinations within the LED chips, the fresh food is displayed in the best possible way: true-to-life colours and a tasteful look.

Residential
I have it at home myself!

Lighting is becoming increasingly important in residential projects and is becoming indispensable. The right lighting can determine the atmosphere of a home. With new additions to our program such as the compact 48V track system and the extensive Meteora serie we can provide the right solution for these projects.

ENABLED

LIGHTING DEFINITIONS

In our product descriptions you will find a number of typical lighting definitions and symbols. We have summarized some of the most commonly used product features in accessible descriptions.

LUMEN - *Output of luminous flux*

The amount of light output generated by a lightsource. The higher the lumen output, the higher the amount of light.

CRI Ra - *Colour rendering index*

Indicates on a scale 0-100 how natural a light source can render true colours of illuminated objects and spaces. Natural daylight has a CRI of 100Ra.

CCT - *Collerated Colour Temperature*

CCT is measured in degrees Kelvin (K) and indicates the colour appearance of the light source. Artificial light is mostly rated between 2200K and 5700K. The higher the temperature, the cooler the light.

UGR - *Unified Glare Rating*

The UGR is the index that quantifies the discomfort glare. UGR is rated between 10 and 28 whereby 10 is very comfortable. Office lighting should always be lower than 19 (UGR <19)

LED MODULES

Standard

Basic lighting module available in CRI >80Ra and >90Ra in 2700K, 3000K, 4000K, and 5700K.

Premium

Excellent quality of light and colour rendition, combined with high energy efficiency. Ideal for creating ambience, fresh whites and depth of colour in many retail environments. Premium White module available in CRI >80Ra and >90Ra in 3000K, 3500K and 4000K.

Food

LED modules dedicated towards fresh food applications. Food WarmWhite Module: Enhances the appearance of fresh food, such as bread, fruit and vegetables. Food Premium Meat Module: Enhances the appearance of fresh meat. Fresh Fish Module: Enhances the appearance of fresh fish.

DTW

Dim-to-Warm is a technology that reduces a luminaire's colour temperature when being (phase) dimmed, from 3000K to 2200K. This makes our Dim-to-Warm fixtures ideal to use in domestic and hospitality projects and gives the feeling of cosy halogen lamps.

TW

Tunable White allows you to control the colour temperature of a fixture between 2500K and 7000K. Our Tunable White fixtures can be controlled using the user friendly Casambi app or via DALI.

CRI98

Full Spectrum CRI >98Ra. The high fidelity spectral output of our Full Spectrum modules creates stunning environments with the best possible natural and vivid colour rendering. Available in 3000K and 4000K.

HE+

The new High Efficiency+ Fortimo SLM G7 LED Modules provide >15% more efficiency (Lm/W) in comparison to our standard CRI90 modules without compromising on reliability or quality of light.

OPTIES

Dimmable TRIAC — Dimmable DALI — Dimmable 1-10V — Honeycomb — Glass — Casambi — Emergency unit

TRIAC - A switch that is used to control power by phase cutting. When used in lighting applications, it's commonly referred to as Triac dimming.

DALI - Protocol of controlling the luminaire whereby a data signal can control each driver individually.

1-10V - the driver generates an analogue signal of 1V (minimum) to 10V maximum, which reaches the dimmer switch (potentiometer) which modulates it.

This is an interactive catalogue: the products can be found quickly and easily by scanning the **QR codes**. With every product you can find a QR code which can be scanned with the camera on your mobile phone. After following the link you will be redirected to the relevant product on our website.

TRACKLIGHTS

Our track lighting is extremely flexible and versatile. You can choose from a variety of different designs and lighting options. All of them equipped with the latest generation LED- and smart- technology. Combine these Made-in-Holland tracklights with our Powergear® 3-circuit track for the perfect flexible solution for any project and industry.

RGBWW: Colours can vary like a rainbow; from light green, deep blue to dark red. But also neutral white (CRI90) is available.

TW: Tunable White, with this function the light can vary from 2500K (extra warm white) to 7000K (daylight). Also known as Human Centric Lighting whereby the colour of the light simulates the day light cycle (Sunrise, Noon, Sunset).

Casambi
Casambi is a bluetooth low energy lighting solution. A large number of our fixtures can be equipped with the Casambi option. All Casambi products automatically form a wireless mesh network. It can be controlled by smartphones, tablets or smart watches. The Casambi App can be downloaded for free in the App store. With Casambi you can:

• **Dim the lighting***
• **Group luminaires and controll them together**
• **Configure, save and recall scenes**
• **Adjust light colours***
• **Adjust colour temperatures***
• **Take pictures and add lighting control directly to your picture**
• **Defining timers for the purpose of Human Centric Lighting***

* Fixtures have to be equiped with this feature

Made in Holland

We are designers with technical knowledge and know better than anyone how light works. The difference is made by the perfect combination of the right luminaire, LED modules, lumen-output, light colours and focal points. We have all the craft and knowledge in house to convert concepts into unique custom-made lighting solutions. All Internova luminaires are assembled in the Netherlands. We keep the production process in our own hands, therefore we are extremely flexible and we guarantee quality and pure craftsmanship.
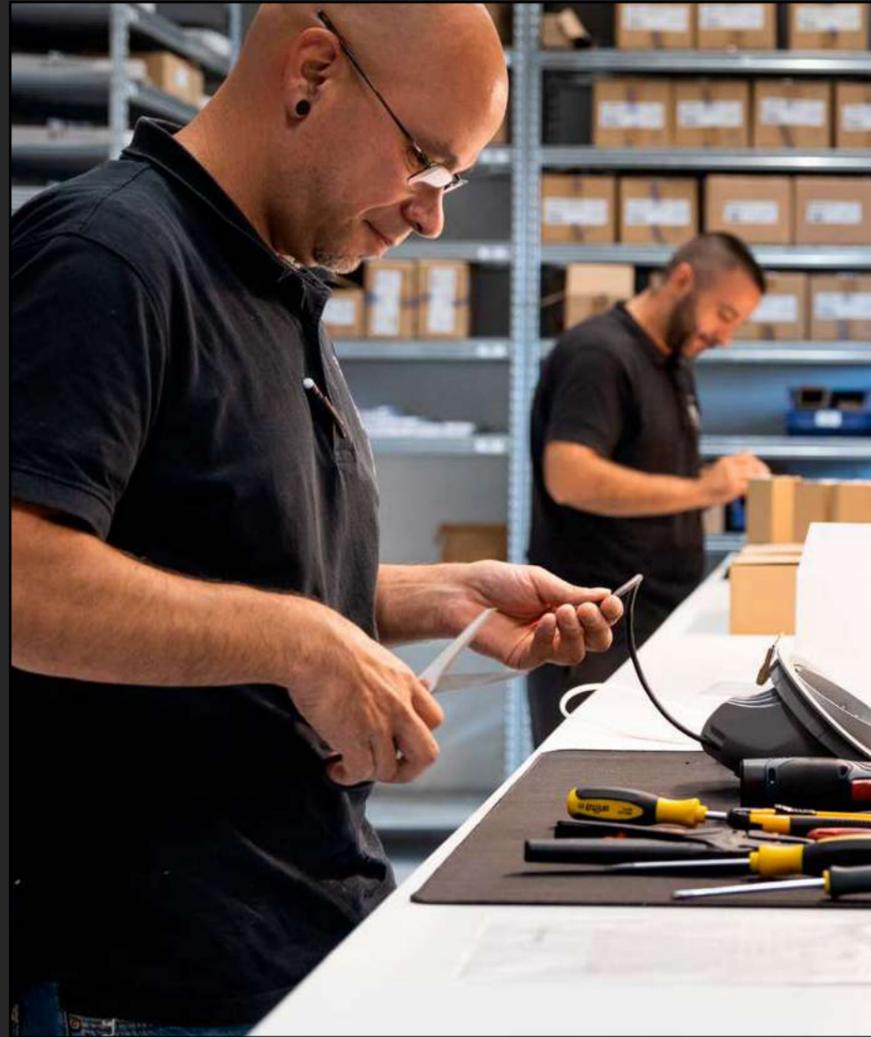

Producers of light.

No light without a plan

Light creates atmosphere, branding, conversion and routing. Good lighting does not consist of a simple combination of spots and tracks. For the right lighting, a well-thought-out lighting plan is essential. Internova designs customized (3D) lighting plans for our partners.

POWERGEAR®

48V Low voltage track system

The high quality Powergear 48V lighting track system for the professional lighting market is suitable for tracklights with Powergear 48V adapters. Specially designed for high-end (domestic) market due to its slim and subtle look.
A comprehensive range of innovative accessories and a multitude of different adapters, give designers maximum freedom to create unique and smart 48V lighting designs. Powergear 48V lighting track comes in various surface mounted and recessed versions. The "EZCLICK" mounting features complete the system and make the track system quick and easy to install.
