SITOP PSU8200/3AC/36VDC/13A

SITOP PSU8200 36 V/13 A stabilized power supply input: 400-500 V 3 AC output: 36 V DC/13 A *Ex approval no longer available*

input		
type of the power supply network	3-phase AC	
supply voltage at AC minimum rated value	400 500 V	
supply voltage at AC maximum rated value		
supply voltage at AC initial value	320 575 V	
supply voltage at AC full-scale value		
wide range input	Yes	
buffering time for rated value of the output current in the event of power failure minimum	15 ms	
operating condition of the mains buffering	at Vin = 400 V	
line frequency	50/60 Hz	
line frequency initial value	47 63 Hz	
line frequency full-scale value		
input current		
 at rated input voltage 400 V 	1.2 A	
 at rated input voltage 500 V 	1 A	
current limitation of inrush current at 25 °C maximum	16 A	
I2t value maximum	0.8 A ² ·s	
fuse protection type	none	
fuse protection type in the feeder	Required: 3-pole connected miniature circuit breaker 6 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)	
output		
voltage curve at output	Controlled, isolated DC voltage	
output voltage at DC rated value	36 V	
output voltage		
at output 1 at DC rated value	36 V	
output voltage adjustable	Yes; via potentiometer	
adjustable output voltage initial value	36 V	
adjustable output voltage full-scale value	42 V; max. 480 W	
relative overall tolerance of the voltage	3 %	
relative control precision of the output voltage		
 on slow fluctuation of input voltage 	0.1 %	
on slow fluctuation of ohm loading	0.2 %	
residual ripple		
maximum		
● IIIaXIIIIuIII	100 mV	
voltage peak	100 mV	
	100 mV	
voltage peak		
voltage peak ● maximum	200 mV	

rocponeo dolay mayimum	2.5 s	
response delay maximum voltage increase time of the output voltage	2.5 \$	
	500 mg	
• maximum	500 ms	
output current • rated value	40. A	
	13 A	
• rated range	0 13 A; +60 +70 °C: Derating 2%/K	
supplied active power typical	468 W	
short-term overload current	20.4	
at short-circuit during operation typical	39 A	
duration of overloading capability for excess current		
at short-circuit during operation	25 ms	
constant overload current		
on short-circuiting during the start-up typical	14 A	
bridging of equipment	Yes; switchable characteristic	
number of parallel-switched equipment resources for increasing the power	2	
efficiency in percent	94 %	
· ·	34 /0	
power loss [W]	30 W	
 at rated output voltage for rated value of the output current typical 	30 VV	
closed-loop control		
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.1 %	
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	1 %	
·		
setting time	0.2 ms	
• load step 50 to 100% typical		
load step 100 to 50% typical relative control precision of the cutout valtage at lead step of	0.2 ms	
relative control precision of the output voltage at load step of resistive load 10/90/10 % typical	2 %	
setting time		
load step 10 to 90% typical	0.2 ms	
* **	0.2 ms	
load step 90 to 10% typical maximum	0.2 ms 10 ms	
• load step 90 to 10% typical		
 load step 90 to 10% typical maximum protection and monitoring 		
 load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection 	10 ms < 48 V	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof	10 ms < 48 V Yes	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	10 ms < 48 V Yes	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability	 10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A 	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown"	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic resource protection class	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic resource protection class leakage current maximum	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard	48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference	48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20 EN 55022 Class B	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20 EN 55022 Class B EN 61000-3-2	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity	48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20 EN 55022 Class B	
I load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals	10 ms < 48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20 EN 55022 Class B EN 61000-3-2	
load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability	48 V Yes Alternatively, constant current characteristic approx. 14 A or latching shutdown 14 A overload capability 150 % lout rated up to 5 s/min 14 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 0.9 mA IP20 EN 55022 Class B EN 61000-6-2 EN 61000-6-2

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
