SIEMENS

Data sheet 6GT2790-0CB00

product type designation

product description

Protective sleeve IP65 for RJ45 plug-in connector

Protective sleeve with heavy-gauge threaded joint for RJ45 connector for subsequent mounting at Ethernet cables

SIMATIC RTLS accessory, IP65 protective sleeve for RJ45 plug on gateway, suitable for Ethernet cable: 6XV1870-3Qxxx minimum order quantity: 5 units.

suitability for use	For sealing of the Ethernet connector Amphenol LTW RCP-5SPFFHTCU7001 at gateways according to IP65
suitability for operation	suitable for Ethernet cable 6XV1870-3Qxxx
mechanical data	
material	Nylon
color	black
tightening torque	0.8 1.5 N·m
ambient conditions	
ambient temperature	
during operation	-40 +70 °C
during storage	-40 +70 °C
during transport	-40 +70 °C
protection class IP	IP65/67
design, dimensions and weights	
design	Modular connector for Ethernet cable
height	57.5 mm
diameter	25.4 mm
connectable cable cross-section	5 6.5 mm
installation or assembly note	The green plastic connector at the Ethernet cable 6XV1870-3Qxxx must be removed before the installation. Observe the mounting instructions.
standards, specifications, approvals	
certificate of suitability	UL 94 V-0
 RoHS conformity 	Yes

Security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and

networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
