SITOP PSU6200/1AC/DC24V/20A/EX

SITOP PSU6200 Ex 20 A stabilized power supply input: 120/230 V AC output: 24 V DC/20 A with diagnostic interface with painted printed circuit boards

1put		
type of the power supply network	1-phase AC or DC	
supply voltage at AC		
minimum rated value	120 V	
 maximum rated value 	240 V	
initial value	85 V	
full-scale value	264 V	
supply voltage at DC	110 240 V	
input voltage at DC	85 275 V	
wide range input	Yes	
overvoltage overload capability	300 V AC for 30 s	
buffering time for rated value of the output current in the event of power failure minimum	25 ms	
operating condition of the mains buffering	at Vin = 240 V	
line frequency	50/60 Hz	
line frequency	47 63 Hz	
input current		
 at rated input voltage 120 V 	4.3 A	
at rated input voltage 240 V	2.3 A	
current limitation of inrush current at 25 °C maximum	12 A	
fuse protection type	10 A	
fuse protection type in the feeder	Circuit breaker from 6 A characteristic B to 16 A characteristic C or circuit breaker 3RV2011-1HA10 (setting 8A) or 3RV2711-1HD10 (UL 489)	
utput		
voltage curve at output	Controlled, isolated DC voltage	
number of outputs	1	
output voltage at DC rated value	24 V	
output voltage		
at output 1 at DC rated value	24 V	
output voltage adjustable	Yes; via potentiometer	
adjustable output voltage	24 28 V; max. 480 W (576 W up to 45°C)	
relative control precision of the output voltage		
on slow fluctuation of input voltage	0.2 %	
on slow fluctuation of ohm loading	0.2 %	
residual ripple		
maximum	80 mV	
• typical	50 mV	
voltage peak		
• maximum	100 mV	

• typical	60 mV	
display version for normal operation	Green LED for 24 V OK	
type of signal at output	Electronic contact (NO contact, contact rating 30 V DC/0.1 A) for DC O.K. or diagnostic interface	
behavior of the output voltage when switching on	Overshoot of Vout approx. 3 %	
response delay maximum	0.5 s	
voltage increase time of the output voltage		
• typical	100 ms	
output current		
rated value	20 A	
• rated range	0 20 A; 24 A up to +45°C; +60 +70 °C: Derating 3%/K	
•		
supplied active power typical	480 W	
short-term overload current		
on short-circuiting during the start-up typical	30 A	
at short-circuit during operation typical	30 A	
parallel switching of outputs	can be set with DIP switch	
bridging of equipment	Yes; switchable characteristic	
number of parallel-switched equipment resources for increasing the power	2	
efficiency		
efficiency in percent	95.5 %	
power loss [W]		
 at rated output voltage for rated value of the output current typical 	25 W	
during no-load operation maximum	2.6 W	
closed-loop control		
relative control precision of the output voltage at load step of	3 %	
resistive load 10/90/10 % typical		
setting time		
load step 10 to 90% typical	0.5 ms	
load step 90 to 10% typical	0.5 ms	
• maximum	1 ms	
maximum protection and monitoring	1 ms	
	1 ms < 32 V	
protection and monitoring		
protection and monitoring design of the overvoltage protection	< 32 V	
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	< 32 V Yes	
protection and monitoring design of the overvoltage protection property of the output short-circuit proof	< 32 V Yes Shutdown and periodic restart attempts	
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability	< 32 V Yes Shutdown and periodic restart attempts 30 A	
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation	< 32 V Yes Shutdown and periodic restart attempts	
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic resource protection class	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic resource protection class leakage current	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic resource protection class leakage current • maximum	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic resource protection class leakage current • maximum protection class IP	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic resource protection class leakage current • maximum protection class IP standard	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability	< 32 V Yes Shutdown and periodic restart attempts 30 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
