

Omron's Ethernet Cables and Connectors The best connection for both inside and outside the panel

In coordination with our extensive lineup of telecommunication products, our Ethernet cables deliver

Reliable connection quality

Industrial Ethernet Cables Series

With the growing prevalence of IoT, automated factory sites are also replacing serial connection with Ethernet as their main method of communication, and their expectations for connection quality are becoming increasingly demanding.

At Omron, we provide an extensive array of Industrial Ethernet cables and connectors that our unique technologies in connection (One-touch Smartclick) and environmental resistance to enable reliable connection.These products support both controller-level and device-level networks, and can be used together with general-purpose Ethernet as well.

You can ensure connection quality by coordinating them with our PLCs and other products from our assortment of Ethernet devices.

STEP1 | Select by standard / use environment

Omron's Cables and Connectors support EtherNet/IP[™], EtherCAT[®], and other Industrial Ethernet, allowing for selection according to standard and use environment

1.Select by cable standard (Ethernet speed)

Be sure to use Ethernet Cables and Connectors that supports Ethernet speed you need. Check the Ethernet speed of your PLC, sensors, and any other component you plan to use and select cables and connectors that complies with the necessary standards.

Cat6A For high-speed communication

Cables with RJ45 Connectors

Cat5e

Cables with RJ45 Connectors Cables with M12 Connectors (Round Water-resistant Connectors)

- Notes: 1. We recommend for 100BASE-TX/10BASE-T, use STP (shielded twisted-pair) cable of category 5 or higher and 1000BASE-T, use STP cable of category 5e or higher with double shielding (aluminum tape and braiding).
 - 2. For Power over Ethernet (PoE) applications, use cable of category 5 or higher and make sure to check the rated values of both the PoE device and Ethernet Cables and Connectors.

2. Select by cable use environment

Use RJ45 connectors for in-panel wiring and M12 connectors (Round Water-resistant Connectors) with IP67 protection for wiring outside the control panel where environmental resistance is required.

Note: The data on this page are the results of OMRON testing. They may vary for your environment and application conditions. Treat them as a reference. STEP2 Use properly products according to feature

Extensive lineup of high-quality products allows for use of different models according to purpose

Product features

RJ45 Connectors

Cables with standard RJ45 Connectors XS6W-6PUR

· Compact RJ45 connectors reduce in-panel cable routing space

- · Enhanced wiring flexibility
- · Double-shielded for use in hostile, noisy environments

>P.11

Cables with standard RJ45 Connectors XS6W-6LSZH

- Individual foil shield
- · Compact RJ45 connectors reduce in-panel cable routing space
 - Flame-retardant low smoke zero halogen (LSZH) cables produce very little toxic gases even if they should burn
 - · Cable colors include blue, yellow, or green.
 - Note: This model, while single-shielded, has been confirmed to provide communication/noise characteristics that meet the standards.

Cables with Rugged RJ45 Connectors XS5W-T421- MD-

- · RJ45 connectors with tough latch structure
- · Double-shielded for use in hostile, noisy environments

>P.15

>P.11

M12 Connectors

Cables with standard M12 Connectors $XS5\Box$ -T42 \Box - \Box M \Box - \Box \Box

- Environment-resistant M12 connectors (Round Water-resistant Connectors) with IP67 protection that can be mated one-touch (approximately 1/8 of a turn)
- Double-shielded for use in hostile, noisy environments
- · Extensive product lineup, including cables with right-angle connectors and those for panel mounting

>P.15

Cables with Strengthened shield M12 Connectors XS5 --- T42 -- M -- SS

 Offers environmental resistance and one-touch mating, with strengthened shielding for enhanced noise resistance.

Copper foil tape added to connector portion for improved communication characteristics.

>P.15

OMRON | 7

RJ45 Assembly Connectors XS6G-T421-1

Enables easy on-site Ethernet cable assembly without crimp tools or other special tools.

System Configuration

TIPS 📋 Basic guide to Industrial Ethernet cables

Specifications of Industrial Ethernet cables

Twisted-pair cables and their shielding play key roles in ensuring communication quality in hostile factory.

What is a twisted-pair cable?

A cable consisting of a pair of wires twisted together is commonly called a twisted-pair cable. Its relative resistance to noise has made it the cable most widely used for Ethernet and other communication.

Effects of shielding

Industrial twisted-pair cables are shielded to further improve their noise resistance. STP (shielded twisted-pair) cables, also called FTP (folded twisted-pair) cables, are distinguished from UTP (unshielded twisted-pair) cables used in regular office environments.

The chart below demonstrates the shielding effects of unshielded, Higher numbers represent greater shielding effects (i.e. higher

Ethernet cable standards / points of note

There are several things to note in enabling stable operation of PLCs and other Ethernet communication devices. Observe the following when selecting and using Ethernet cables.

POINT1 Compliance to Ethernet cables standards

Ethernet is a LAN protocol, and based on standards by Ethernet speed (Band rate).

The higher the communication speed, the higher the transmission signal frequency and the more susceptible it is to noise. Choose the right cable to ensure standard-compliant communication speed.

To find an Omron product that best suits your needs, see "1. Select by cable standard (band rate for Ethernet)" on page 04.

10BASE-T	 10 Mbit/s communication speed Star network (LAN) with maximum cable length of 100 m
100BASE-TX	 High communication speed of 100 Mbit/s Many 100BASE-TX devices are 10BASE-T compatible, allowing for mixed
10GBASE-T	 Next-generation high-speed network that can provide 10 Gbit/s connections Significantly reduces data transfer time, increasing efficiency

Standard requirement examples

POINT2 Ethernet cable wiring / use environment

Actual Ethernet cable wiring entails bending in many places, as shown in Figure 1.

When cables are bent (Figure 2), it induces noise; users should therefore take into account the place of installation (in-panel and outside), installation space, and equipment configuration and choose a cable that is suited for their purpose.

▶ To find an Omron product that best suits your needs, see "2. Select by cable use environment" on page 05.

Figure 1. Wiring example

Figure 2. How bending can affect twisted-pair structure

Bending radius < specified minimum: Twisted-pair structure iscompromised, increasing noise susceptibility

Note: For minimum bending radius (R) values, see "Safety Precautions" on page 26.

Industrial Ethernet Cables

Cables and Connectors for EtherNet/IP[™], EtherCAT[®] and Other Industrial Ethernet Networks

Cables with RJ45 Connectors

- For in-panel wiring
- LSZH with Standard RJ45 Connectors (Cat6A)
- PUR with Standard RJ45 Connectors (Cat5 and Cat6A)
- PVC with Rugged RJ45 Connectors (Cat5e)

Cables with M12 Connectors (Round Water-resistant Connectors)

- For wiring outside the control panel where environmental resistance is required.
- PVC with M12 Connectors (Cat5e) that enables one-touch (1/8 turn) locking.
- PVC Robot cable are available.

Specifications

	Туре	Cable with Connectors on Both Ends (RJ45/RJ45)/LSZH	Cable with Connectors on Both Ends (RJ45/RJ45)/PUR				
Item	Model	XS6W-6LSZH8SS	XS6W-5PUR8SS	XS6W-6PUR8SS			
Rated current		1 A (at 50°C)					
Rated voltage *		30 VDC					
Contact resistance		20 mΩ max.					
Insulation resistance	Э	500 MΩ min.					
Withstand voltage		1,000 VDC for 60 s (leakage current: 1 m	A max.)				
Ambient operating te	emperature	-20 to 75°C -40 to 80°C -30 to 75°C					
Ambient storage ten	nperature	-20 to 75°C -40 to 80°C -20 to 70°C					
Protective structure		IP20					

* Voltage varies by installation environment.

Materials and Finish

Connectors

Item	Model	XS6W-6LSZH8SS	XS6W-6LSZH8SSDDDCM-D XS6W-5PUR8SSDDDCM-G XS6W-6PUR8SSDDCM-YF					
Connector housing		PC resin	PC resin					
Contacts		Copper alloy/Gold plating						
Shield		Copper alloy/Nickel plating						
Anchors								
Anchors (tabs)								
Cover (structured to preven from breaking)	nt the tab	PA resin						
Marking tube		PVC resin						

Cables

	Туре	Cable with Connectors on Both Ends (RJ45/RJ45)/LSZH		ctors on Both Ends J45)/PUR	
Item	Model XS6W-6LSZH8SS		XS6W-5PUR8SS	XS6W-6PUR8SS	
Compliant standard		IEC 60332-1 /UL444	IEC 60332-1	IEC 61156-6, IEC11801, IEC 60332-1	
Category		Cat6A	Cat5	Cat6A	
Number of cores		AWG26			
Outer diameter *1		6.3 dia.	6.0 dia.	6.5 dia.	
Sheath color *2		Blue, Yellow, Green	Green	Yellow	
Sheath material		LSZH	PUR		
Shield structure		Single shield	Double shield		

Dimensions

Cables with Rugged RJ45 Connectors, and Cables with M12 Connectors (Round Water-resistant Connectors)

Model Number Structure

Model Number Legend

Use this legend when determining the product specifications from the model number. Choose from the model numbers listed in *Ordering Information* when ordering.

Cable with Connectors

0 Connector Shape

H: Cable with plug on one end W: Cable with connectors on both ends

- 2Type
- T: Ethernet

3Number of Pins

4: 4 pins

4Contact Plating Specification

2: Gold plating

⑤Cable Attachment Direction (M12 Connectors)

- 1: Straight
- 2: Right angle

6Cable Length

A: 0.3 m	J: 10 m
B: 0.5 m	K: 15 m
C: 1 m	L: 20 m
D: 2 m	T: 25 m
E: 3 m	N: 30 m
F: 4 m	Z: 35 m
W: 4.5 m	P: 40 m
G: 5 m	X: 50 m

OConnector Shape

- 0: M12 plug on one end
- 1: Connectors on both ends: M12 socket/M12 plug
- 2: Connectors on both ends: M12 plug/M12 plug
- 3: Connections on both ends: M12 socket/M12 socket
- C: Connectors on both ends: M12 plug/RJ45 plug
- D: Connectors on both ends: RJ45 plug/RJ45 plug
- E: Connectors on both ends: M12 socket/RJ45 plug

®Cable Specification

- K: Standard cable (Cable color: Light blue)
- Y: Standard cable (Cable color: Yellow)
- KR: Robot cable (Cable color: Light blue)
- YR: Robot cable (Cable color: Yellow)
- SS: Shield Strengthening model

(Standard cable, Cable color: Black)

Note.M12 connector locking type is D-coding.

RJ45 Assembly Connectors

Note.Please consult with OMRON for types other than the above.

The rear locking type is attached from the front of the panel, and the nut is tightened from the back.

The front locking type is attached from the back of the panel, and the nut is tightened from the front.

● Cable Bending Data for Robot Cables (XS5W-T421-□M□-□R)

The following data is the results of OMRON testing for cable bending test conditions. The number of bends may vary for your environment and application conditions.

Cableveyor test

Number of bends: 20 million min.

Speed: Approx. 120 m/minute Distance moved: 1 m Cableveyor radius: 75 mm

90° bending test

Number of bends: 6 million min.

Bending angle: ±90° Bending rate: Approx. 30 times/minute Roll radius: 60 mm Load: 500 g

• IEC 61076-2-101 Compliant M12 Connector Pinout Diagram (from Mating Side) Coding refers to the shape of the connector mating part, which prevents incorrect mating.

The mating shape of M12 connectors for Ethernet is D-coding.

Assembly Procedure

• RJ45 Assembly Connectors XS6G-T421-1

- 1. Pass the cable through the cable clamp and the connector housing
- 2. Strip the cable sheath and ground braiding to the correct lengths.
- 3. Follow the color codes and prepare to insert the wires into the splice piece.
- 4. Insert the wires into the splice piece for the length of the splice piece.
- 5. Place the splice piece into the RJ45 data module and engage it.
- Place the data module and the splice piece on the IDC assembly housing.
- Press the data module and the IDC assembly housing together and use pliers or a similar device to make the insulation displacement contact.
- Remove the data module from the IDC assembly housing.
- Place the upper screen plate on the data module and press it over the ground braiding of the cable.
- Place the lower screen plate on the bottom of the data module, align it with the upper screen place, and latch it until you hear it click into place.
- 11. Slide the housing that you placed around the cable in step 1 up to the data module and latch it until you hear it click into place.
- 12. Tighten the cable clamp.

M12 Panel-mounting PCB Straight Terminals XS5P-T426-1

Confirming the Number of Parts

The following four parts are included in the package when it is delivered.

 Panel-mounting Parts
 PCB-mounting Part

 1. Anchor
 2. O-Ring
 3. Nut
 4. Connector

Assembly Procedure

1. Mount the connector to the PCB.

2. Attach the anchor to the panel with the nut.

Mounting the Connector to the PCB Mounting the Anchor to the Panel

 Attach the connector that you mounted to the PCB to the panel.
 * Make sure that the connector and anchor are oriented correctly. Attachment

4. Temporarily mount the O-ring to the top of the connector at the mating surface.

5. Mate the Connector Waterproof Cover (XS2Z-22, sold separately) or the Partner Connector Plug (XS5H-T42□-□M0-K, sold separately) and press the O-ring to the O-ring position after mounting.

Connector Waterproof Cover (Sold Separately) XS2Z-22

* Tightening torque: 0.39 to 0.49 N·m

Safety Precautions

Definitions of Precautions

Precautions for Safe Use	These refer to actions that should be performed or refrained from in order to ensure safe product usage.							
Precautions for Correct Use	These refer to actions that should be performed or refrained from in order to prevent product breakage, malfunctioning, and negative effects to performance and functionality.							

Precautions for Safe Use

Degree of Protection

Do not use these products if their protective structures have deteriorated, such as swelling or breakage of housing and sealing components.

If products with deteriorated protective structures continue to be used, breakage or fire damage, etc., may occur.

Connector Connection and Disconnection

- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not hold the cable when disconnecting Connectors.
- Use after confirming the direction of the polarity key groove. • Do not touch wiring with wet hands. Doing so may result in
- malfunction or breakage when the device is turned on.
- When mating Connectors, be sure to insert the plug all the way to the back of the socket before attempting to lock the Connectors.

After operating the lock, always confirm that the Connector is connected.

- Do not use tools of any sort to mate the Connectors. Always use your hands.
- Pliers or other tools may damage the Connectors.
- When replacing the Connector, confirm that no foreign substances such as liquids or cutting oils are adhered to the connection surface of the Connector before connecting.

Disposal

Dispose of this product as industrial waste.

Precautions for Correct Use

- Do not use the Connectors in an atmosphere or environment that exceeds the specifications.
- Do not perform wiring while power is flowing. Doing so may result in electrical shock or device breakage.
- Do not use the Connectors in an environment where corrosive gases or high temperature/high humidity are present. Doing so may result in malfunctions such as connection/contact failures and corrosion.
- Do not pull excessively on the Connectors or cables.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.
- Install the Connectors in a location where they will not be stepped on, to prevent disconnection of the cables or damage to the Connectors. If the Connectors or cables must be installed where they might be stepped on, protect them with covers.
- If a sensor or switch is not attached during installation, or if the plug connector is not engaged, use a waterproof cover or dust cover to protect the mating surface of the connector.

Wiring

- Do not perform wiring in environments where the cable ends may be exposed to liquids such as water or cutting oils.
- Follow the wiring diagrams when wiring the cables. Confirm that connections are possible before use.
- Lay the cables so that external force is not applied to the Connectors. Otherwise, the degree of protection may not be achieved.

Degree of Protection (IP67)

• The degree of protection of Connectors (IP67) is not for a fully watertight structure. Do not use the Connectors underwater.

Setup

• Do not install the Connectors or cables in any way that would place a load directly on the mating section or cable connections.

Doing so can damage the Connectors or break the wires inside the cables.

• If bending XS5H/W-T cable, ensure that the minimum bend radius is 40 mm.

• If bending XS6W-6LSZH/5PUR cable, ensure that the minimum bend radius is 25 mm.

• If bending XS6W-6PUR cable, ensure that the minimum bend radius is 52 mm.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
