A timing relay is a component which is designed to time events in industrial automation systems by closing or opening

its contacts before, during, or after a set timing period. The new products are incorporated with spring terminals.

Hence, the product safety and EMC properties of newly added products are identical to those products that are

incorporated with screw clasp terminals.

### Compliance

The above mentioned product complies with the requirements of the relevant ACMA Standards made under the *Radiocommunications Act 1992* and the *Telecommunications Act 1997*. These Standards are referenced in notices made under *section 182 of the Radiocommunications Act and 407 of the Telecommunications Act*.

Evidence of compliance is demonstrated by test reports to the following applicable standards.
