

## Verklaring in het kader van de Europese richtlijn REACH (EG) 1907/2006

30-09-2021

BV Twentsche Kabelfabriek (TKF) hereby declares that all its supplied products comply with the European REACH Directive as set out in REACH (EC) 1907/2006.

As a downstream producer of raw materials, TKF supplies products that are classified under REACH as articles and preparations and as such are not subject to registration.

Our products are made from raw materials, some of which are subject to registration.

Therefore, TKF has informed all its suppliers that all "substances in preparations" delivered to TKF must be registered according to the above framework and requested them to confirm to TKF that they comply with the directive.

TKF will monitor compliance with the directive when substances and preparations are released by checking the relevant declarations and/or product safety data sheets (MSDS).

Non-registered substances will not be purchased and processed in accordance with the timelines set out in the REACH regulation.
