

Heated Towel Rails with Thermostatic Controller Heating Range

MANF150/250/400-WIFI

Range Options

The Manrose thermostatic controller included heated towel rail range provides a practical and stylish heating solution for modern bathrooms. Available in 150W, 250W and 400W models, the range combines efficient towel warming, intelligent temperature control and Wi-Fi app functionality for convenient everyday use.

Advantages of Towel Rails

Designed to warm and dry towels while adding gentle background heat, the range helps improve bathroom comfort and supports the reduction of condensation and moisture build-up.

Style and Comfort

Featuring a slim chrome finish and built-in thermostatic controller, the range offers simple manual operation as well as Wi-Fi app control, allowing users to manage heating settings, timer functions and comfort levels more conveniently.

Thermostat Controller

Each heated towel rail comes with a white thermostatic controller, giving users simple and convenient control of heat output.

Key features include:

- LED temperature display
- Easy dial adjustment for quick temperature control
- ECO mode and timer mode
- Wi-Fi app control for remote operation
- ERP compliant (EU 2024/1103)
