

MULTIMATCH R

Handheld high **CRI+** LED work light with new CCT SCAN function

ORIGINAL
SCANGRIP
SINCE 1906

Handy and powerful work light with high CRI+ LED for inspection and detailing providing up to 1200 lumen.

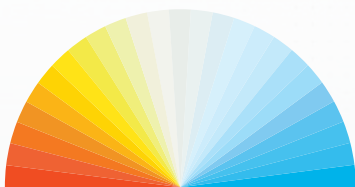

Compared to the previous model, the upgraded MULTIMATCH R features a unique, stepless CCT SCAN function. By activating the CCT SCAN function, the work light will automatically scan the surface of the object with the entire colour temperature spectrum from 2500K to 6500K. At any point, the CCT SCAN function can be locked and in this way you will be able to customize the light to the specific inspection task. It is the ultimate tool for the professional detailer, providing ideal conditions for accurate colour match and highlighting and discovering imperfections.

The lamp is easy to carry and is ergonomically designed for a good grip on the handle, which is also equipped with powerful integrated magnets for flexible mounting. This gives you high flexibility and application possibilities for internal inspection of cars and other narrow areas.

Rechargeable built-in power bank with USB outlet to charge mobile devices.

The lamp is designed for direct mounting on the SCANGRIP TRIPOD and WHEEL STAND. By using the SCANGRIP WHEEL STAND, MULTIMATCH R can be mounted on the lower bracket as a second light to illuminate from below. This dual light option provides perfect, shadow free illumination from the upper side as well as from the underside when working on the side of the car.

Replaces 03.5652 which will be discontinued.
