Ergonomic Tool Carrier.

Your New Ergonomic Companion.

This is an open, soft sided toolbox, designed for ergonomic carrying. The back of the bag has an ergonomic curve that gives your leg better room to move, and you don't have to lift the bag as far away from your body when you walk. It also features a robust molded base that prevents the bag from tipping over, protects the bottom from moist, dirt and wear - and keeps your tools dry. The bag is made from an extremely durable ballistic polyester - 1680 Denier - for maximum wear resistance and service life. The front and back of the bag have different heights, giving you a good overview and access from the front and more support for your tools on the back. It has a large centre compartment, lined with pockets and toolholders. There are medium sized pockets with lids and zippers for safe storage of sensitive equipment. It also features a tape measure holder, pen holders, a key chain holder and elastic loops for smaller tools.

One of the side pockets contains a rain and dust cover. It's made from a rip stop fabric and protects the bag and its content from bad weather, dust and dirt. The handle is extra high, making it easier to reach down and pick up the bag. It has a long rubber covering so you can grip comfortably along the entire handle and balance an unevenly loaded bag. The handle folds away for easy access and overview. The adjustable shoulder strap has an extra-long padding with an anti-slip surface for comfortable and easy carrying.

- 25 pockets and tool holders, including a securely zippered pocket on the side and a clip for measuring tapes.
- Ergonomically curved back for easier carrying and a fold-away handle with extra-long ergonomic rubber clad grip.
- Protective and stable molded base.
- The bag is tested with a 60 kg static load and made from an extremely durable ballistic polyester - 1680 Denier.
- Dimensions: 42 x 26 x 27 cm

Rain and dust cover included.

Open toolbox with 25 pockets.

Ergonomically curved back for easier carrying.
