NEW 2024

Molded Base Tool Backpack.

Durable and hands free.

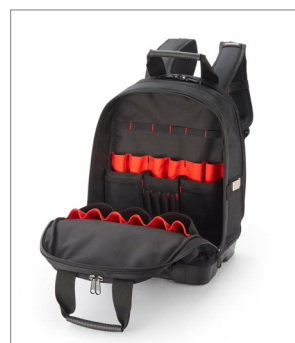

An Ergonomic, heavy duty, all-purpose tool backpack with a robust molded base. The molded base prevents the bag from tipping over, protects the bottom from moist, dirt and wear - and keeps your tools dry. The bag is made from an extremely durable ballistic polyester - 1680 Denier - for maximum wear resistance and service life.

It has two large compartments which zippers fully open. This allows you to fold down the outer side completely, giving you maximum overview and access. The outer compartment is lined with plenty of pockets and tool holders. Alternating red and black fabric makes it easier to tell different tools and pockets apart.

The compartment closest to your back has a padded pocket for laptop, tablets and documents. It can fit laptops up to 15". It has medium sized pockets with lids and zippers for safe storage of sensitive equipment, transparent pockets making it easy to find what you are looking for and an external water bottle pocket on the left side of the bag. It also features an external tape measure holder, pen holders, a key chain holder and elastic loops for smaller tools such as screwdrivers.

The adjustable shoulder straps have an anti-slip surface and a 3D-shape which follows the curvature of the body for optimal ergonomic carrying. Both the back of the bag and the shoulder straps have ventilated padding for cool and comfortable work. On the top of the bag, you'll find two comfortable rubber handles, they allow you to easily fold up the back and front when you need to quickly reposition the bag. The zippers are nylon coil zippers - very durable with large metal pullers that are easy to grip, even with gloves on.

- 42 pockets and tool holders, including a padded sleeve for a laptop/tablet, metal clip for measuring tapes and a water bottle pocket.
- Protective and stable molded base.
- Ergonomically 3D-shaped, padded shoulder straps.
- The bag is tested with a 60 kg static load and made from an extremely durable ballistic polyester - 1680 Denier.
- Dimensions: 37 x 34 x 48 cm

Backpack with 42 pockets.

Protective and stable molded base.
