Electrician's Tool Pouch.

A small bag with big flexibility.

An ergonomic tool pouch for electricians and technicians. It is shaped like a small messenger bag - designed to be worn while you work, keeping your tools within reach.

The bag is made from an extremely durable ballistic polyester - 1680 Denier - for maximum wear resistance and service life. The back is slightly curved and padded for an optimum fit. Loops on the back also allow you to attach it directly to your belt so you can wear it on your hip (fits belts up to 60 mm wide). The zippered lid keeps your equipment safe when not in use and the lid folds away on the outside making it easy to keep the bag open for easy access to the tools. It has one main compartment with multiple pockets to help you organize electrician's tools and testers. Alternating red and black fabric makes it easier to tell different tools and pockets apart. There are pockets with lids and zippers for safe storage of sensitive equipment. It also features an external tape measure holder, an electrician tape strap, a hammer holder, pen holders, a key chain holder, loops for smaller tools such as screwdrivers and a small loop for attaching a carabiner.

The adjustable shoulder strap is padded and has an anti-slip surface for comfortable and easy carrying. It is detachable, with metal carabiners for maximum durability. On the top of the bag, you'll also find a comfortable rubber handle. The zippers are nylon coil zippers - very durable with large metal pullers that are easy to grip, even with gloves on.

- Zippered main compartment with fold-away lid.
- 21 pockets and tool holders, including a tape strap, clip for measuring tape and hammer holder.
- Designed to be worn while you work with both a shoulder strap and loops that allows you to attach it directly to your belt.
- The bag is tested with a 30 kg static load and made from an extremely durable ballistic polyester - 1680 Denier.
- Dimensions: 31 x 15 x 39 cm

21 pockets and tool holders.

Adjustable shoulder strap.
