UK LINE LIGHT DIMMER

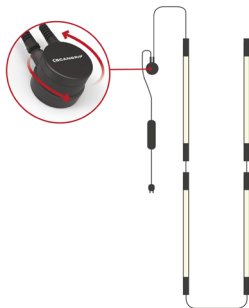

LINE LIGHT DIMMER PLACEMENT

The dimmer must always be placed BEFORE the first Line Light unit.

Line Light 2-post dimmer placement:

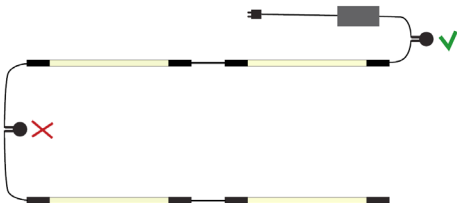

Line Light 4-post dimmer placement:

UK LINE LIGHT DIMMER

LINE LIGHT DIMMER PLACEMENT

- The dimmer must always be placed BEFORE the first Line Light unit.

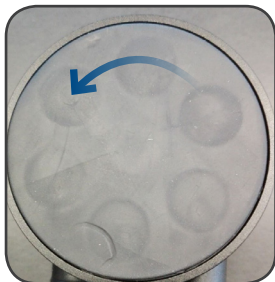

MOUNTING LINE LIGHT DIMMER

- Cut the wire from the power supply at the place where the dimmer should be mounted.

UK LINE LIGHT DIMMER

- Unscrew the magnet lid on the dimmer to access the connectors inside.

- Unscrew the spirals from the cable glands attached to the dimmer.

UK LINE LIGHT DIMMER

- Place the spiral on the cable from the power supply.

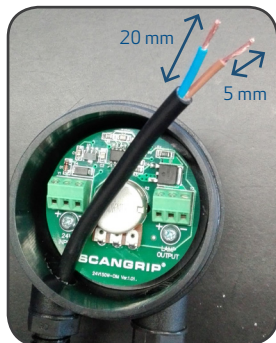

- Route the wire from the power supply through the cable gland on the "24V input" side of the dimmer.

UK LINE LIGHT DIMMER

- Strip the wire based on measurements on below picture.

- Place the BROWN wire in the + side of the connector and the BLUE wire in - side of the connector. Tighten the screws on the connector when done.

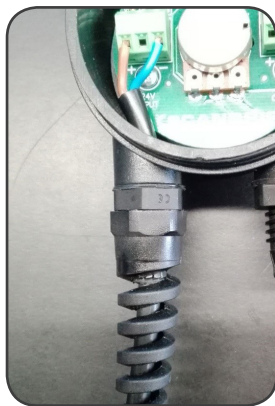

UK LINE LIGHT DIMMER

- Pull back the wire to minimized excess wire inside the dimmer.

- Mount the spiral on the cable gland and fully tighten it to ensure, that the wire cannot be pulled out of the connector.

UK LINE LIGHT DIMMER

- Place the 2nd spiral on the wire going to the first Line Light Unit.

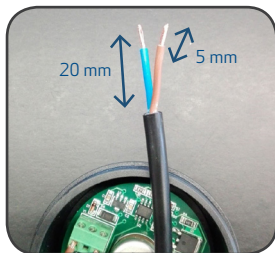

- Insert the wire going to the first Line Light unit into the "Lamp Output" side of the dimmer.

UK LINE LIGHT DIMMER

- Strip the wire based on measurements on below picture.

- Place the BROWN wire in the + side of the connector and the BLUE wire in - side of the connector. Tighten the screws on the connector when done.

- Pull back the wire to minimized excess wire inside the dimmer.

UK LINE LIGHT DIMMER

- Mount the spiral on the cable gland and fully tighten it to ensure, that the wire cannot be pulled out of the connector.

- Reinsert the magnet lid on the dimmer and fully tighten it.

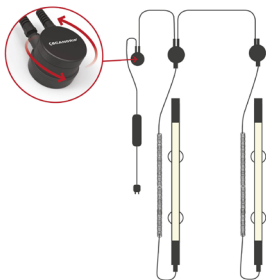

DK LINE LIGHT DIMMER

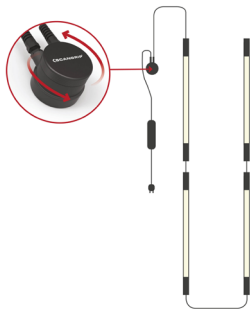

MONTAGE AF LINE LIGHT LYSDÆMPEREN

Lysdæmperen skal altid monteres FØR den første Line Light-enhed.

Placering af lysdæmper på Line Light 2-post-system:

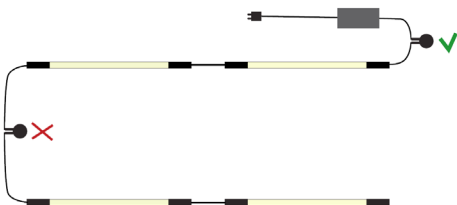

Placering af lysdæmper på Line Light 4-post-system:

DK LINE LIGHT DIMMER

PLACERING AF LINE LIGHT LYSDÆMPER

- Lysdæmperen skal altid placeres FØR den første Line Light-enhed.

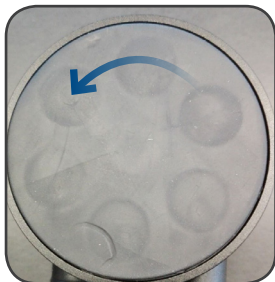

MONTERING AF LINE LIGHT LYSDÆMPER

- Klip ledningen af strømforsyningen på det sted, hvor lysdæmperen skal monteres.

DK LINE LIGHT DIMMER

- Skru magnetdækslet af dæmperen, for at få adgang til stikkene indeni.

- Skru fjedrene af kabelforskrutningerne på lysdæmperen. Placer fjederen på ledningen fra strømforsyningen.

DK LINE LIGHT DIMMER

- Placer fjederen på ledningen fra strømforsyningen.

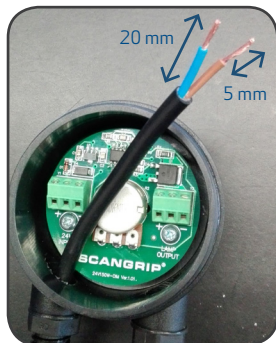

- Før ledningen fra strømforsyningen gennem kabelforskrningen på den side af dæmperen som betegnes "24V input".

DK LINE LIGHT DIMMER

- Afisoler ledningen baseret på målene på nedenstående billede.

- Placer den BRUNE ledning i stikkets plus-side og den BLÅ ledning i stikkets minus-side. Spænd skruerne på stikket, når du er færdig.

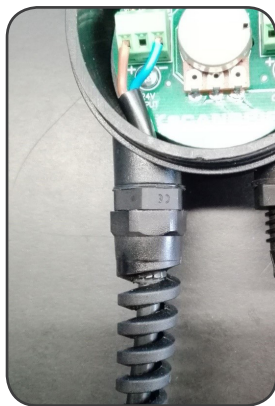

DK LINE LIGHT DIMMER

- Træk ledningen tilbage, for at minimere overskydende ledning inde i lysdæmperen.

- Monter fjederen på kabelforskrningen og stram den helt for at sikre, at ledningen ikke kan trækkes ud af stikket.

DK LINE LIGHT DIMMER

- Placer den 2. fjeder på ledningen, som løber til den første Line Light-enhed.

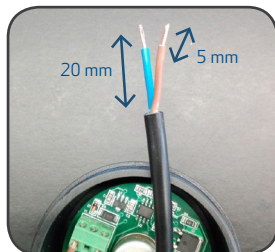

- Sæt ledningen, som løber til den første Line Light-enhed, i den side af lampen, som betegnes "Lamp Output".

DK LINE LIGHT DIMMER

- Afisoler ledningen baseret på målene på nedenstående billede.

- Placer den BRUNE ledning i stikkets plus-side og den BLÅ ledning i stikkets minus-side. Spænd skruerne på stikket, når du er færdig.

- Træk ledningen tilbage, for at minimere overskydende ledning inde i lysdæmperen.

DK LINE LIGHT DIMMER

- Monter fjederen på kabelforskrningen og stram den helt for at sikre, at ledningen ikke kan trækkes ud af stikket.

- Sæt magnetlåget på dæmperen igen og skru det helt fast.

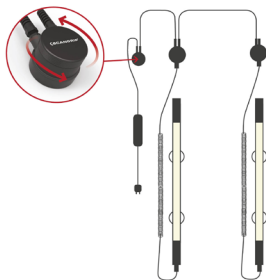

DE LINE LIGHT DIMMER

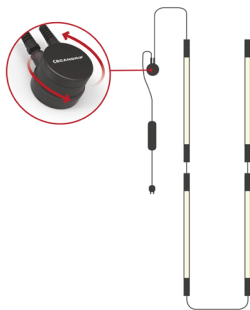

MONTAGE DES LINE LIGHT DIMMERS

Der Dimmer muss immer VOR der ersten Line Light Einheit eingesetzt werden.

Montage am Line Light 2-post-System:

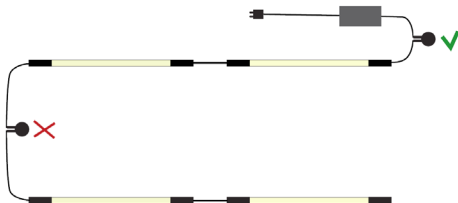

Montage am Line Light 4-post-System:

DE LINE LIGHT DIMMER

MONTAGE DES LINE LIGHT DIMMERS

- Der Dimmer muss immer VOR der ersten Line Light Einheit eingesetzt werden.

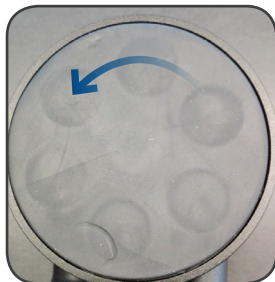

EINBAU DES LINE LIGHT DIMMERS

- Das Stromversorgungskabel an der Stelle durchtrennen, an der der Dimmer eingesetzt werden soll.

DE LINE LIGHT DIMMER

- Magnetkappe vom Dimmer abschrauben, um auf die Stecker darunter zugreifen zu können.

- Die Schutzspiralen von den Kabelverschraubungen am Dimmer abschrauben. Die Schutzspirale am Stromversorgungskabel anbringen.

DE LINE LIGHT DIMMER

- Die Schutzspirale am Stromversorgungskabel anbringen.

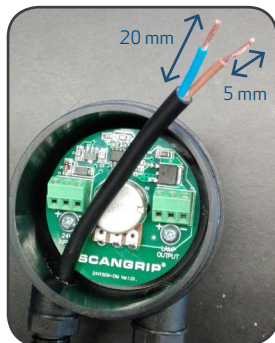

- Das Kabel von der Stromversorgung durch die Kabelverschraubung am 24-V-Eingang des Dimmers einziehen.

DE LINE LIGHT DIMMER

- Das Kabel entsprechend den Maßangaben in der folgenden Abbildung abisolieren.

- Das BRAUNE Kabel auf der + Seite und das BLAUE Kabel auf der - Seite in den Stecker einsetzen.

DE LINE LIGHT DIMMER

- Vorher am Kabel ziehen, um den Kabelüberstand im Dimmer so kurz wie möglich zu halten.

- Die Schutzspirale an der Kabelverschraubung anbringen und einwandfrei festziehen, damit das Kabel nicht aus dem Stecker herausgezogen werden kann.

DE LINE LIGHT DIMMER

- Die 2. Schutzspirale am Anschlusskabel der ersten Line Light Leuchte anbringen.

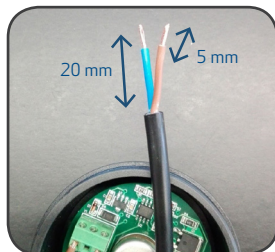

- Das Anschlusskabel der ersten Line Light Leuchte am Leuchtenausgang des Dimmers einziehen.

DE LINE LIGHT DIMMER

- Das Kabel entsprechend den Maßangaben in der folgenden Abbildung abisolieren.

- Das BRAUNE Kabel auf der + Seite und das BLAUE Kabel auf der - Seite in den Stecker einsetzen.

- Anschließend die Schrauben des Steckers festziehen. Vorher am Kabel ziehen, um den Kabelüberstand im Dimmer so kurz wie möglich zu halten.

DE LINE LIGHT DIMMER

- Die Schutzspirale an der Kabelverschraubung anbringen und einwandfrei festziehen, damit das Kabel nicht aus dem Stecker herausgezogen werden kann.

- Die Magnetkappe wieder am Dimmer anbringen und einwandfrei festziehen.

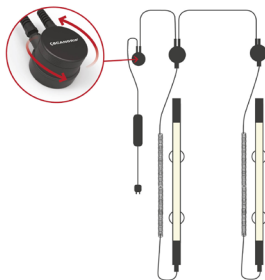

FR LINE LIGHT DIMMER

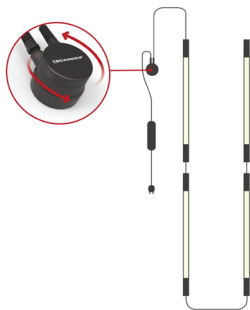

POSITIONNEMENT DE VARIATEUR LINE LIGHT

Le variateur doit toujours être placé AVANT la première unité Line Light.

Positionnement de variateur Line Light 2 montants :

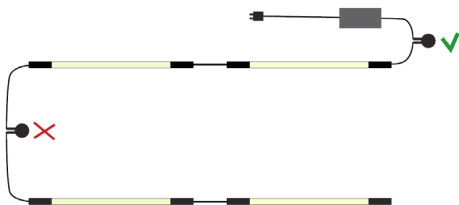

Positionnement de variateur Line Light 4 montants :

FR LINE LIGHT DIMMER

POSITIONNEMENT DU VARIATEUR POUR LINE LIGHT

- Le variateur doit toujours être positionné AVANT la première Line Light.

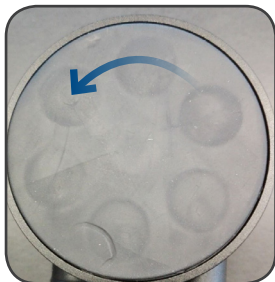

MONTAGE DU VARIATEUR POUR LINE LIGHT

- Couper le fil de l'alimentation à la longueur correspondant au montage du variateur.

FR LINE LIGHT DIMMER

- Dévisser le couvercle aimanté sur le variateur pour accéder aux connecteurs à l'intérieur.

- Dévisser les spirales des presse-étoupe fixés au variateur.

FR LINE LIGHT DIMMER

- Placer la spirale sur le fil venant de l'alimentation électrique.

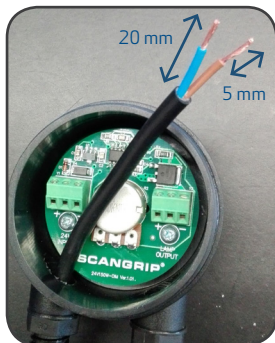

- Amener le fil venant de l'alimentation électrique au travers du presse-étoupe jusqu'à la face « 24V input » (entrée 24 V).

FR LINE LIGHT DIMMER

- Dénuder le fil conformément aux mesures présentées sur l'illustration ci-dessous.

- Insérer le fil MARRON dans le côté + du connecteur et le fil BLEU dans le côté - du connecteur. Serrer ensuite les vis du connecteur.

FR LINE LIGHT DIMMER

- Tirer sur le fil pour minimiser l'excédent de fil dans le variateur.

- Monter la spirale sur le presse-étoupe et serrer ce dernier au maximum pour éviter que le câble ne puisse être arraché du connecteur.

FR LINE LIGHT DIMMER

- Placer la deuxième spirale sur le fil qui va à la première Light Line.

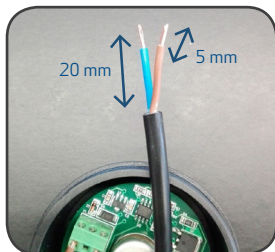

- Insérer celui-ci dans le côté « Lamp output » (sortie lampe) du variateur.

FR LINE LIGHT DIMMER

- Dénuder le fil conformément aux mesures présentées sur l'illustration ci-dessous.

- Insérer le fil MARRON dans le côté + du connecteur et le fil BLEU dans le côté - du connecteur. Serrer ensuite les vis du connecteur.

- Tirer sur le fil pour minimiser l'excédent de fil dans le variateur.

FR LINE LIGHT DIMMER

- Monter la spirale sur le presse-étoupe et serrer ce dernier au maximum pour éviter que le câble ne puisse être arraché du connecteur.

- Remonter le couvercle aimanté sur le variateur et le serrer à bloc.

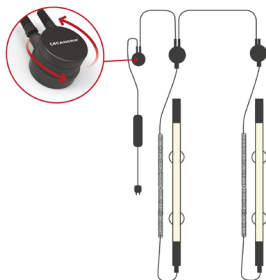

IT LINE LIGHT DIMMER

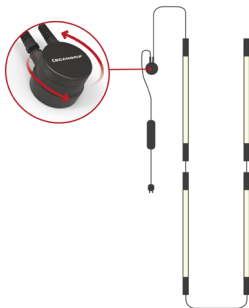

POSIZIONAMENTO DEL VARIATORE DI LUCE LINE LIGHT

Il variatore di luce deve essere sempre posizionato A MONTE della prima unità Line Light.

Posizionamento variatore di luce Line Light 2-post (2 unità illuminanti):

Posizionamento variatore di luce Line Light 4-post (4 unità illuminanti):

IT

LINE LIGHT DIMMER

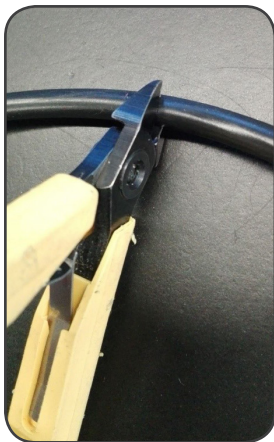

POSIZIONAMENTO DEL DIMMER PER LINE-LIGHT

- Il dimmer deve essere posizionato sempre A MONTE della prima unità Line-Light.

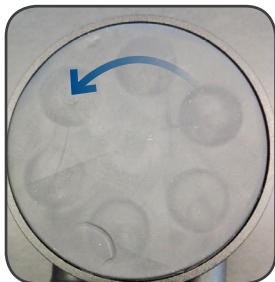

MONTAGGIO DEL DIMMER LINE-LIGHT

- Tagliare il filo dell'alimentazione di corrente in corrispondenza del punto in cui si desidera montare il dimmer.

IT LINE LIGHT DIMMER

- Svitare il coperchio magnetico del dimmer per accedere ai contatti.

- Svitare le spirali dei fermacavi fissati al dimmer.

IT LINE LIGHT DIMMER

- Posizionare la spirale sul cavo di alimentazione.

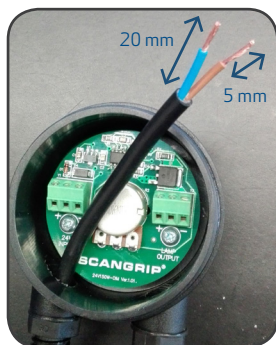

- Inserire, ruotandolo, il cavo di alimentazione attraverso il fermacavo sul lato "24V input" del dimmer.

IT LINE LIGHT DIMMER

- Spelare il cavo in base alle dimensioni indicate sotto.

- Inserire il cavo MARRONE nel lato + del connettore e quello BLU nel lato -. Serrare le viti del connettore.

IT LINE LIGHT DIMMER

- Tendere il cavo per evitare che ne rimanga troppo all'interno del dimmer.

- Montare la spirale sul fermacavo e serrarlo correttamente per evitare che il cavo possa essere tirato via.

IT LINE LIGHT DIMMER

- Posizionare la 2a spirale sul cavo che va verso la prima unità Line-Light.

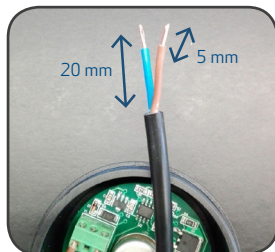

- Inserire il cavo che va verso la prima unità Line-Light sul lato "Lamp Output" del dimmer.

IT LINE LIGHT DIMMER

- Spelare il cavo in base alle dimensioni indicate sotto.

- Inserire il cavo MARRONE nel lato + del connettore e quello BLU nel lato -. Serrare le viti del connettore.

- Tendere il cavo per evitare che ne rimanga troppo all'interno del dimmer.

IT LINE LIGHT DIMMER

- Montare la spirale sul fermacavo e serrarlo correttamente per evitare che il cavo possa essere tirato via.

- Reinserire il coperchio magnetico del dimmer e fissarlo correttamente.

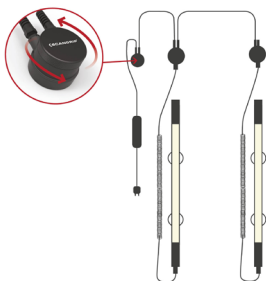

ES LINE LIGHT DIMMER

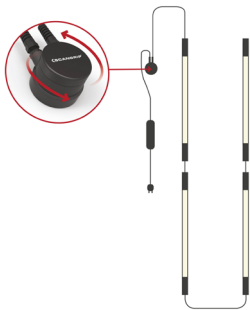

COLOCACIÓN DEL REGULADOR DE INTENSIDAD LINE LIGHT

El regulador debe colocarse siempre ANTES de la primera unidad Line Light.

Colocación de reguladores de intensidad Line Light de 2 columnas:

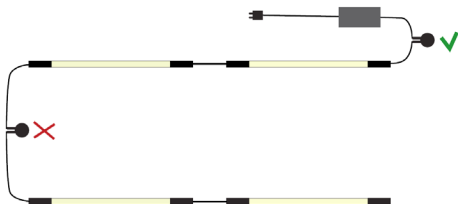

Colocación de reguladores de intensidad Line Light de 4 columnas:

ES LINE LIGHT DIMMER

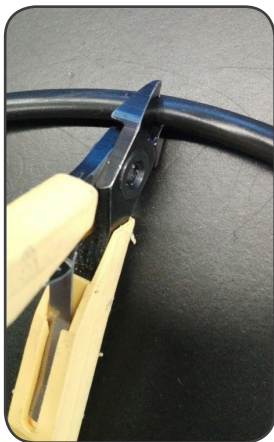

COLOCACIÓN DEL REGULADOR DE INTENSIDAD LINE LIGHT

- El regulador de intensidad debe colocarse siempre **DELANTE** de la primera unidad Line Light.

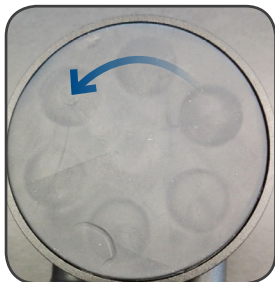

MONTAJE DEL REGULADOR DE INTENSIDAD LINE LIGHT

- Corte el cable de la fuente de alimentación en el lugar donde el regulador de intensidad debe ser montado.

ES LINE LIGHT DIMMER

- Desenrosque la tapa del imán del regulador de intensidad para acceder a los conectores internos.

- Desenrosque las espirales de los prensaestopas conectados al regulador de intensidad.

ES LINE LIGHT DIMMER

- Coloque la espiral en el cable de la fuente de alimentación.

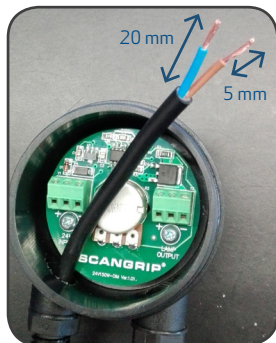

- Guíe el cable de la fuente de alimentación a través del prensaestopas en el lado "entrada 24V" del regulador.

ES LINE LIGHT DIMMER

- Pele el cable sobre la base de las mediciones de la imagen de abajo.

- Coloque el cable MARRÓN en el lado + del conector y el cable AZUL en el lado - del mismo. Apriete los tornillos en el conector cuando haya terminado.

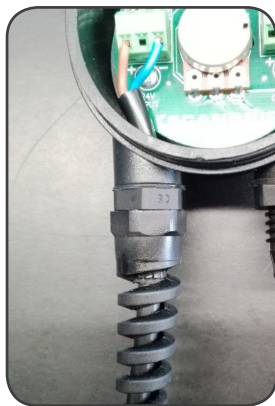

ES LINE LIGHT DIMMER

- Retire el cable para minimizar el exceso de cable dentro del regulador.

- Monte la espiral en el prensaestopas y apriételo completamente para asegurarse de que el cable no pueda extraerse del conector.

ES LINE LIGHT DIMMER

- Coloque la segunda espiral en el cable que va a la primera unidad Line Light.

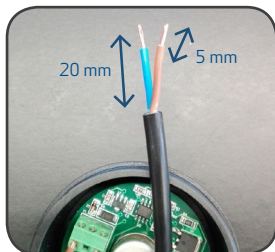

- Inserte el cable que va a la primera unidad Line Light en el lado "Salida de la lámpara" del regulador de intensidad.

ES LINE LIGHT DIMMER

- Pele el cable sobre la base de las mediciones de la imagen de abajo.

- Coloque el cable MARRÓN en el lado + del conector y el cable AZUL en el lado - del mismo. Apriete los tornillos en el conector cuando haya terminado.

- Retire el cable para minimizar el exceso de cable dentro del regulador de intensidad.

ES LINE LIGHT DIMMER

- Monte la espiral en el prensaestopas y apriételo completamente para asegurarse de que el cable no pueda extraerse del conector.

- Vuelva a insertar la tapa del imán en el regulador y apriételo completamente.

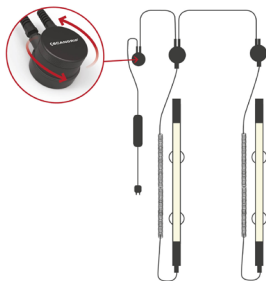

PT LINE LIGHT DIMMER

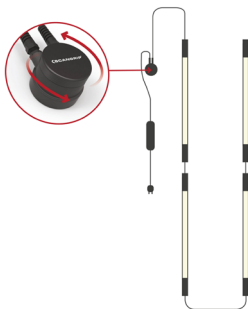

COLOCAÇÃO DO REGULADOR DE INTENSIDADE DA LINE LIGHT

O regulador de intensidade deve ser sempre colocado ANTES da primeira Line Light.

Colocação de regulador de intensidade de Line Light de 2 postes:

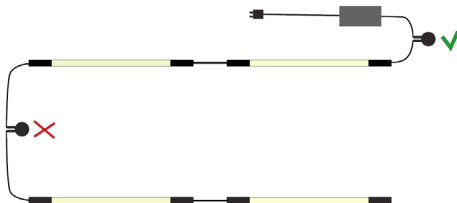

Colocação de regulador de intensidade de Line Light de 4 postes:

PT LINE LIGHT DIMMER

COLOCAÇÃO DO REGULADOR DE LUMINOSIDADE LINE LIGHT

- O regulador de luminosidade deve ser sempre colocado ANTES da primeira unidade Line Light.

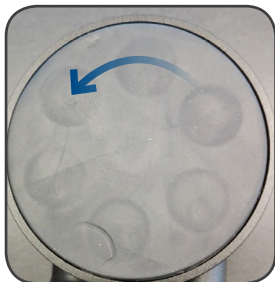

MONTAR O REGULADOR DE LUMINOSIDADE LINE LIGHT

- Cortar o fio da alimentação de energia no local onde vai ser montado o regulador.

PT LINE LIGHT DIMMER

- Desaparafusar a tampa magnética do regulador para ter acesso aos conectores no seu interior.

- Desaparafusar as espirais das glândulas do cabo fixas ao regulador.

PT LINE LIGHT DIMMER

- Colocar a espiral no cabo da alimentação de energia.

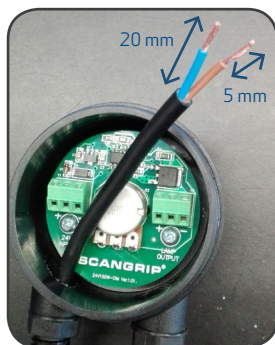

- Passar o fio elétrico através da glândula do cabo no lado da "entrada de 24V" do regulador.

PT LINE LIGHT DIMMER

- Desmanchar o fio nas medidas indicadas na figura abaixo.

- Colocar o fio CASTANHO no lado + do conector e o fio AZUL no lado - do conector. Depois de terminar, apertar os parafusos no conector.

PT LINE LIGHT DIMMER

- Puxar o fio para minimizar fio excedente no interior do regulador de luminosidade.

- Montar a espiral na glândula do cabo e apertar bem para assegurar que não é possível puxar o fio para fora do conector.

PT LINE LIGHT DIMMER

- Colocar a 2ª espiral no fio que sai para a primeira unidade Line Light.

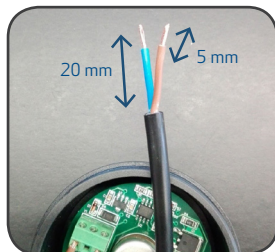

- Passar o fio que vai para a primeira unidade Line Light para o lado "Saída da luz" do regulador.

PT LINE LIGHT DIMMER

- Desmanchar o fio nas medidas indicadas na figura abaixo.

- Colocar o fio CASTANHO no lado + do conector e o fio AZUL no lado - do conector. Depois de terminar, apertar os parafusos no conector.

- Puxar o fio para minimizar fio excedente no interior do regulador de luminosidade.

PT LINE LIGHT DIMMER

- Montar a espiral na glândula do cabo e apertar bem para assegurar que não é possível puxar o fio para fora do conector.

- Voltar a montar a tampa magnética no regulador e apertar bem.

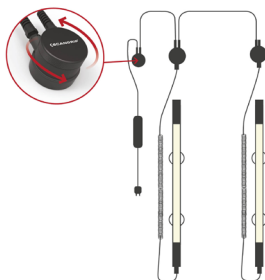

NL LINE LIGHT DIMMER

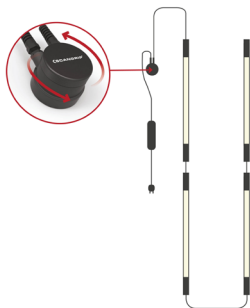

PLAATSING LINE LIGHT-DIMMER

De dimmer moet altijd VOOR de eerste Line Light-eenheid worden geplaatst.

Plaatsing Line Light 2 Post-dimmer:

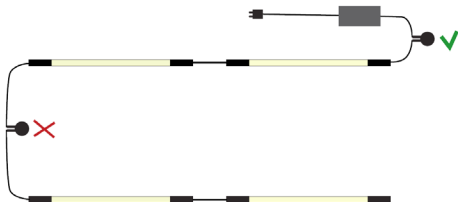

Plaatsing Line Light 4 Post-dimmer:

NL LINE LIGHT DIMMER

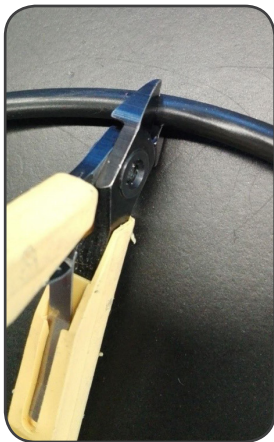

PLAATSING LINE LIGHT-DIMMER

- De dimmer moet altijd worden geplaatst VOOR de eerste Line Light-unit.

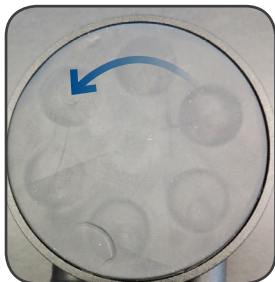

LINE LIGHT-DIMMER MONTEREN

- Snijd de draad van de voeding af op de plaats waar de dimmer moet worden gemonteerd.

NL LINE LIGHT DIMMER

- Schroef het magnetische deksel op de dimmer los om toegang te krijgen tot de connectors aan de binnenkant.

- Schroef de spiralen van de kabelwartels die aan de dimmer zijn bevestigd los.

NL LINE LIGHT DIMMER

- Plaats de spiraal op de kabel van de voeding.

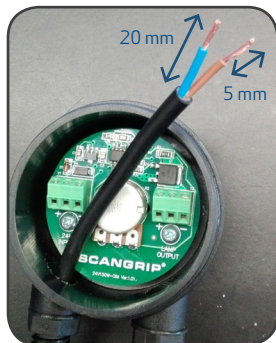

- Leid de draad van de voeding door de kabelwartel op de "24V input"-zijde van de dimmer.

NL LINE LIGHT DIMMER

- Strip de draad op basis van de afmetingen op de onderstaande afbeelding.

- Plaats de BRUINE draad in de +-zijde van de connector en de BLAUWE draad in de - zijde van de connector. Draai de schroeven op de connector vast als u klaar bent.

NL LINE LIGHT DIMMER

- Trek de draad terug, zodat er zo weinig mogelijk draad in de dimmer zit.

- Monteer de spiraal op de kabelwartel en draai volledig vast, zodat de draad niet uit de connector kan worden getrokken.

NL LINE LIGHT DIMMER

- Plaats de 2e spiraal op de draad die naar de eerste Line Light-unit loopt.

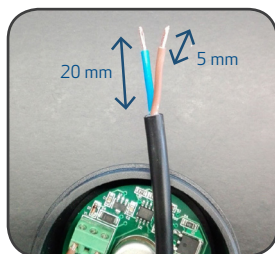

- Breng de draad die naar de eerste Line Light-unit loopt aan in de "Lamp Output"-zijde van de dimmer.

NL LINE LIGHT DIMMER

- Strip de draad op basis van de afmetingen op de onderstaande afbeelding.

- Plaats de BRUINE draad in de +-zijde van de connector en de BLAUWE draad in de - -zijde van de connector. Draai de schroeven op de connector vast als u klaar bent.

- Trek de draad terug, zodat er zo weinig mogelijk draad in de dimmer zit.

NL LINE LIGHT DIMMER

- Monteer de spiraal op de kabelwartel en draai volledig vast, zodat de draad niet uit de connector kan worden getrokken.

- Plaats het magnetische deksel terug op de dimmer en draai het helemaal vast.

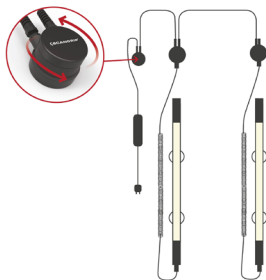

PL LINE LIGHT DIMMER

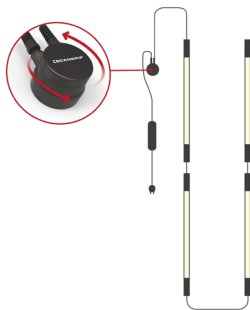

UMIEJSCOWIENIE REGULATORA LINE LIGHT

Regulator musi zostać w każdym przypadku umieszczony PRZED pierwszym członem Line Light (światłem liniowym).

Umiejscowienie regulatora Line Light dwuczłonowego:

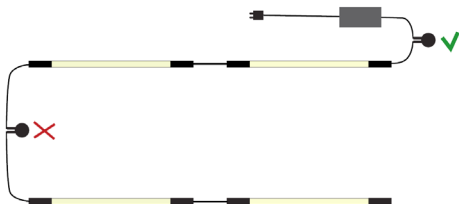

Umiejscowienie regulatora Line Light czteroczłonowego:

PL LINE LIGHT DIMMER

ZAKŁADANIE REGULATORA (ŚCIEMNIACZA) LINII ŚWIETLNEJ

- Regulator należy zamontować PRZED podłączeniem pierwszego elementu Linii Światlnej.

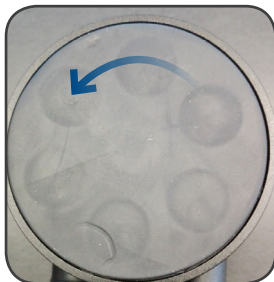

MONTAŻ REGULATORA LINII ŚWIETLNEJ

- Przetnij przewód zasilający w miejscu, gdzie ma być zamontowany regulator.

PL LINE LIGHT DIMMER

- Odkręć pokrywkę magnetyczną regulatora, żeby dostać się do złączy.

- Odkręć nakrętki zaciskowe przepustów regulatora.

PL LINE LIGHT DIMMER

- Załóż nakrętkę przepustu na przewód zasilający.

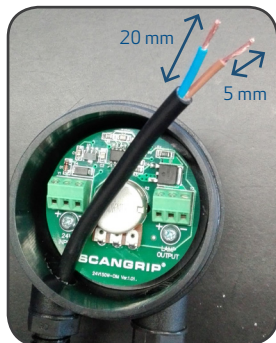

- Wsuń przewód zasilający przez przepust od strony opisanej „24V input”.

PL LINE LIGHT DIMMER

- Odizoluj przewody w sposób pokazany na poniższej ilustracji.

- BRĄZOWY przewód wsuń w otwór oznaczony +, zaś NIEBIESKI w otwór oznaczony -. Następnie dokręć śrubki na złączu.

PL LINE LIGHT DIMMER

- Wyciągnij przewód, żeby w środku regulatora nie pozostał jego nadmiar.

- Zakręć nakrętkę zaciskową tak mocno, żeby przewodu nie dało się wyrwać ze złącza.

PL LINE LIGHT DIMMER

- Załóż drugą nakrętkę na przewód biegnący do pierwszego elementu Linii Świetlnej.

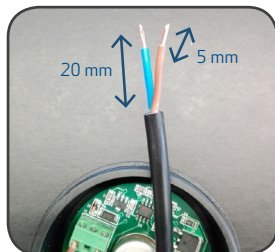

- Wsuń przewód biegnący do pierwszego elementu Linii Świetlnej, od strony opisanej „Lamp Output”.

PL LINE LIGHT DIMMER

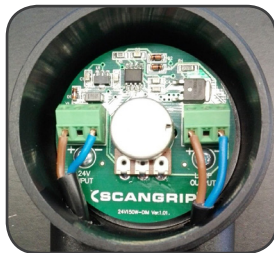

- Odizoluj przewody w sposób pokazany na poniższej ilustracji.

- BRĄZOWY przewód wsuń w otwór oznaczony +, zaś NIEBIESKI w otwór oznaczony -. Następnie dokręć śrubki na złączu.

- Wyciągnij przewód, żeby w środku regulatora nie został jego nadmiar.

PL LINE LIGHT DIMMER

- Zakręć nakrętkę zaciskową tak mocno, żeby przewodu nie dało się wyrwać ze złącza.

- Załóż z powrotem pokrywkę magnetyczną i przykręć ją solidnie.

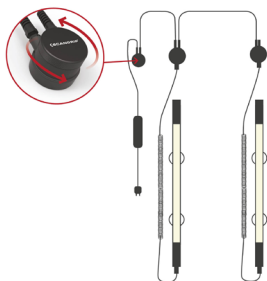

BG LINE LIGHT DIMMER

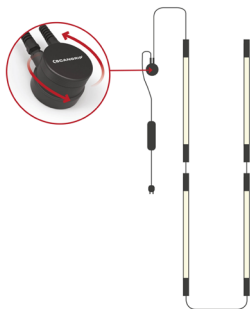

РАЗПОЛАГАНЕ НА ДИМЕРА ЗА ОСВЕТЯВАНЕ НА ЛИНИЯ

Димерът трябва винаги да бъде разпологан **ПРЕДИ** първия модул за осветяване на линия.

Разполагане на димер на осветяване на линия с 2-клеми:

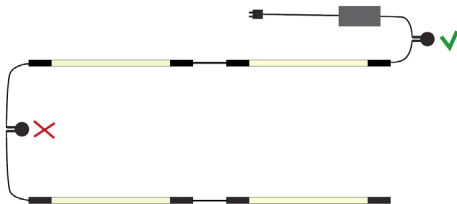

Разполагане на димер на осветяване на линия с 4-клеми:

BG LINE LIGHT DIMMER

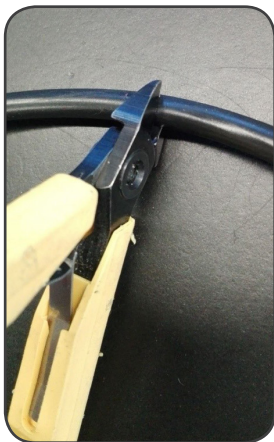

РАЗПОЛАГАНЕ НА ДИМЕРА НА ОСВЕТЯВАНЕТО НА ЛИНИЯ

- Димерът трябва винаги да бъде разпологан ПРЕДИ първия модул за осветяване на линия.

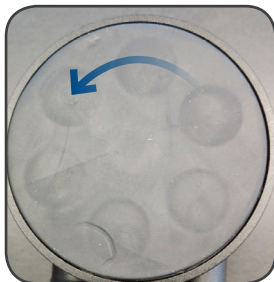

МОНТИРАНЕ НА ДИМЕРА ЗА ОСВЕТЛЯВАНЕ НА ЛИНИЯ

- Срежете проводника от захранването до мястото, където димерът трябва да бъде монтиран.

BG LINE LIGHT DIMMER

- Развийте магнитния капак на димера, за да получите достъп до съединенията вътре.

- Развийте спиралите от кабелните накрайници, захванати към димера.

BG LINE LIGHT DIMMER

- Поставете спиралата на кабела от захранването.

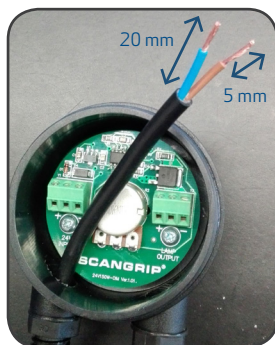

- Прекарайте кабела от захранването през кабелния накрайник от страната Вход 24V - „24V input“ на димера.

BG LINE LIGHT DIMMER

- Оголете кабела въз основа на измерванията на долното изображение.

- Поставете КАФЕВИЯ проводник в страната + на съединението, а СИНИЯ проводник в страната - на съединението.

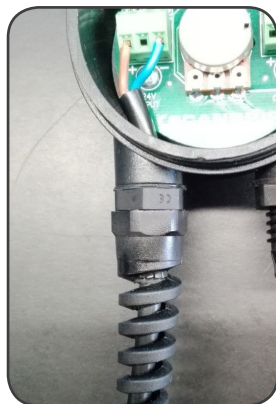

BG LINE LIGHT DIMMER

- Затегнете винтовете на съединението, когато приключите. Издърпайте проводника назад, за да сведете до минимум оставащата част от него вътре в димера.

- Монтирайте спиралата на кабелния накрайник и затегнете здраво, за да гарантирате, че проводникът не може да бъде издърпан от съединението.

BG LINE LIGHT DIMMER

- Поставете 2-рата спирала на проводника, отиващ до първия модул за осветяване на линия.

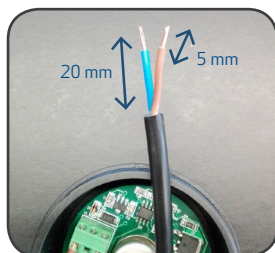

- Вкарайте проводника, отиващ до първия модул за осветяване на линия, в страната Извод за лампа - „Lamp Output“ на димера.

BG LINE LIGHT DIMMER

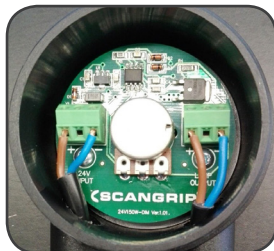

- Оголете кабела въз основа на измерванията на долното изображение.

- Поставете КАФЕВИЯ проводник в страната + на съединението, а СИНИЯ проводник в страната - на съединението.

- Затегнете винтовете на съединението, когато приключите. Издърпайте проводника назад, за да сведете до минимум оставащата част от него вътре в димера.

BG LINE LIGHT DIMMER

- Монтирайте спиралата на кабелния накрайник и затегнете здраво, за да гарантирате, че проводникът не може да бъде издърпан от съединението.

- Вкарайте магнитния капак обратно на димера и до затегнете докрай.

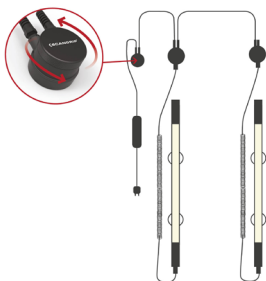

TR LINE LIGHT DIMMER

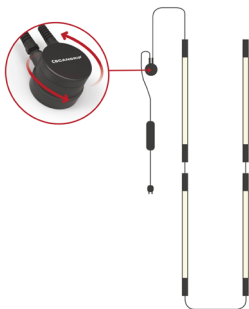

LINE LIGHT KARARTICININ YERLEŐTIRILMESI

Karartıcı daima ilk Line Light ünitesinden ÖNCE yerleőtirilmelidir.

Line Light 2 direkli karartıcının yerleőtirilmesi:

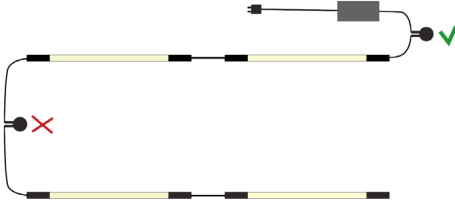

Line Light 4 direkli karartıcının yerleőtirilmesi:

TR LINE LIGHT DIMMER

LINE LIGHT IŞIK KISICI YERLEŞİMİ

- Işık kısıcısı her zaman Line Light ünitesinden ÖNCE yerleştirilmelidir.

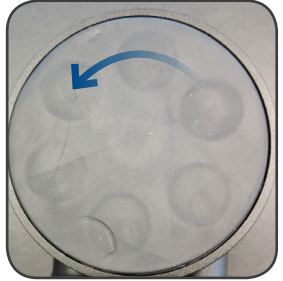

LINE LIGHT IŞIK KISICININ MONTE EDİLMESİ

- Güç kaynağının telini, ışık kısıcının monte edilmesi gereken yerden kesin.

TR LINE LIGHT DIMMER

- Işık kısıcısının içindeki konnektörlere ulaşmak için arkasındaki manyetik kapağı sökün.

- Işık kısıcısına takılı kablo rakorlarındaki spiralleri sökün.

TR LINE LIGHT DIMMER

- Spirali güç kaynağından gelen kabloya yerleştirin.

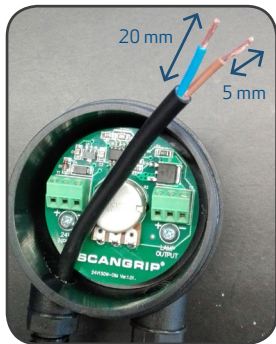

- Güç kaynağından gelen teli ışık kısıcısının "24V giriş" tarafındaki kablo rakorundan geçirin.

TR LINE LIGHT DIMMER

- Teli, aşağıdaki resimde belirtilen ölçümlere göre soyun.

- KAHVERENGİ teli konnektörün + tarafında ve MAVİ teli konnektörün - tarafına yerleştirin. Ardından konnektörün üzerindeki vidaları sıkıştırın.

TR LINE LIGHT DIMMER

- Işık kısıcısı içindeki tel fazlasını en aza indirmek için teli geri çekin.

- Spirali kablo rakoru üzerine yerleştirin ve kablusunun konnektörden çekilmesini engellemek için tamamen sıkıştırın.

TR LINE LIGHT DIMMER

- İkinci spirali ilk Line Light Ünitesine giden telin üzerine yerleştirin.

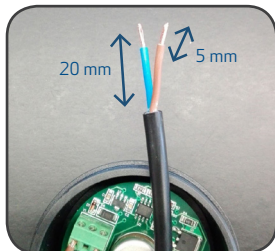

- İlk Line Light ünitesine giden teli ışık kısıcının "Lamba Çıkışı" tarafına yerleştirin.

TR LINE LIGHT DIMMER

- Teli, aşağıdaki resimde belirtilen ölçümlere göre soyun.

- KAHVERENGİ teli konnektörün + tarafında ve MAVİ teli konnektörün - tarafına yerleştirin. Ardından konnektörün üzerindeki vidaları sıkıştırın.

- Işık kısıcısı içindeki tel fazlasını en aza indirmek için teli geri çekin.

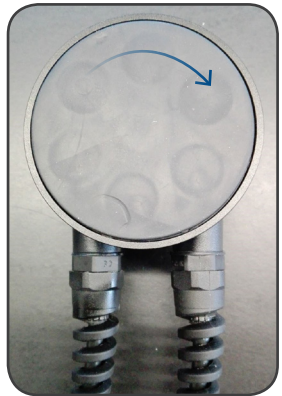

TR LINE LIGHT DIMMER

- Spirali kablo rakoru üzerine yerleştirin ve kablusunun konnektörden çekilmesini engellemek için tamamen sıkıştırın.

- Işık kısıcısının manyetik kapağını yeniden yerleştirin ve tamamen sabitleyin.

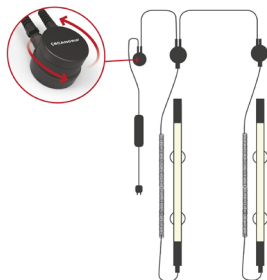

CZE LINE LIGHT DIMMER

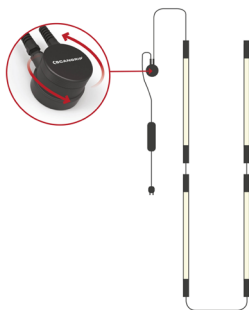

UMÍSTĚNÍ STMÍVAČE LINE LIGHT

Stmívač musí být umístěn vždy PŘED první jednotku Line Light.

Umístění stmívače Line Light pro dvě jednotky:

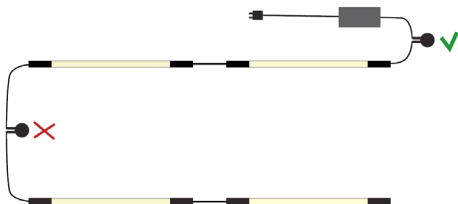

Umístění stmívače Line Light pro čtyři jednotky:

CZE LINE LIGHT DIMMER

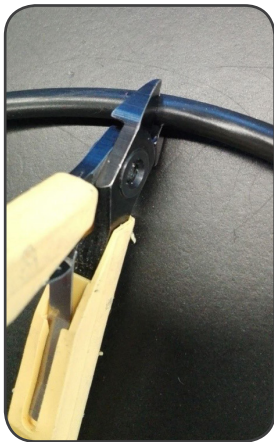

UMÍSTĚNÍ STMÍVAČE SVÍTIDEL LINE LIGHT

- Stmívač musíte umístit vždy PŘED osvětlovací jednotku Line Light.

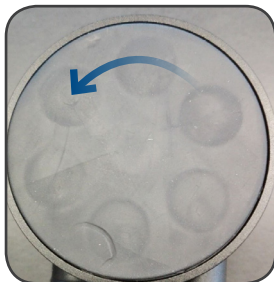

MONTÁŽ STMÍVAČE SVÍTIDEL LINE LIGHT

- Přerušte napájecí kabel v místě, kam chcete umístit stmívač.

CZE LINE LIGHT DIMMER

- Odšroubujte magnetické víčko na stmívači, získáte přístup ke konektorům umístěným uvnitř.

- Odšroubujte spirály z kabelových spojek připojených ke stmívači.

CZE LINE LIGHT DIMMER

- Navlečte spirálu na kabel od napájecího zdroje.

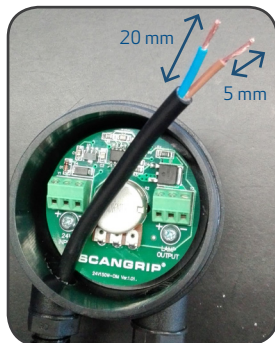

- Proveďte vodič od napájecího zdroje kabelovou spojkou stmívače na straně „24V input“ (24V vstup).

CZE LINE LIGHT DIMMER

- Odizolujte vodič podle měření znázorněných níže na obrázku.

- Umístěte HNĚDÝ vodič na + stranu konektoru a MODRÝ vodič na - stranu konektoru. Po dokončení utáhněte šrouby na konektoru.

CZE LINE LIGHT DIMMER

- Povytláhněte vodič zpět, aby co nejméně přechýlval ve stmívači.

- Našroubujte spirálu na kabelovou spojku a naplno ji utáhněte, aby vodič nešlo vytáhnout z konektoru.

CZE LINE LIGHT DIMMER

- Navlečte druhou spirálu na vodič pokračující k první osvětlovací jednotce Line Light.

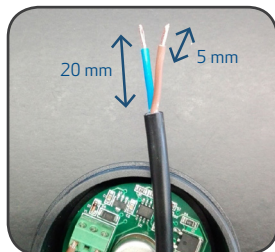

- Vsuňte vodič pokračující k první osvětlovací jednotce Line Light do stmívače na straně „Lamp Output“ (Výstup k svítidlu).

CZE LINE LIGHT DIMMER

- Odizolujte vodič podle měření znázorněných níže na obrázku.

- Umístěte HNĚDÝ vodič na + stranu konektoru a MODRÝ vodič na - stranu konektoru. Po dokončení utáhněte šrouby na konektoru.

- Povytáhněte vodič zpět, aby co nejméně přechníval ve stmívači.

CZE LINE LIGHT DIMMER

- Našroubujte spirálu na kabelovou spojku a naplno ji utáhněte, aby vodič nešlo vytáhnout z konektoru.

- Umístěte zpět magnetické víčko na stmívač a naplno jej utáhněte.
