

Compact Round Hand Dryer

Specification

- ▶ 10-15 second drying time
- ▶ High airspeed: 95 m/s
- ▶ With HEPA filter
- ▶ Sound: 72dB(A)
- ▶ Smart auto temperature adjustment
- ▶ Comfortable airflow: 20–40°C
- ▶ Power: 950W at 230V
- ▶ Brushed motor
- ▶ IPX3 Rated
- ▶ Touch free operation
- ▶ Automatic 30-second shut-off
- ▶ ADA compliant
- ▶ CE, UKCA and RoHS approved
- ▶ 255 x 250 x 100mm (H x W x D)
- ▶ Weight: 3.0 kg

Design & Build Quality

The Round ABS High Speed Hand Dryer features a slim, compact, modern design ideal for professional washrooms. Its low-profile body protrudes less than 100 mm from the wall, ensuring full ADA compliance while maintaining a clean, unobtrusive appearance. Constructed from durable ABS, the unit offers excellent vandal resistance, robust protection against damage, and easy installation. Available in White, Dark Silver, and Black finishes, it complements a wide range of washroom styles.

Hygienic Air Filtration

An antibacterial HEPA filter cleans the air before it reaches the user's hands, helping maintain a more hygienic washroom environment by reducing airborne contaminants.

High-Performance Drying

A high-velocity 95 m/s airflow delivers fast 10–15 second drying. The unit operates between 20–40°C for comfortable performance, with a green/red indicator light showing clear operating status.

Smart Sensing & Safety

Touchless infrared activation detects hands within a 9–15 cm range. Safety features include a 30-second auto shut-off, heating element cut-out above 25°C ambient temperature, and IPX3 moisture protection for reliable operation in demanding environments.
