

Passive Wall Vent

Product Datasheet

Passive wall vents are recommended where no air brick or vents are present. They help to equalise air pressure throughout the dwelling especially in bedrooms when used in conjunction with mechanical ventilation systems.

- Pullcord opening valve
- Telescopic 100mm tube
- Designed for essential return airflow
- Water deflectors and insect screen on exterior grille
- Internal valve with anti-draught inlet plate
- Free air opening 4000mm²
- Exterior grille in white or brown
- Acoustic lining
